Cement, Concrete, and Aggregates
Subject Index
Volume, 19, 1997

A

Absorption rates
Evaluation of laboratory drying procedures relevant to field conditions for concrete sorptivity measurements (DeSouza, SJ, Hooton, RD, and Bickley, JA), Dec., 59

Air entrainment
Closure (Pleau, R), Dec., XX
Discussion of “the use of the flow length concept to assess the efficiency of air entrainment with regards to frost durability: Part I—Description of the test method” by Richard Pleau and Michel Pigeon (Snyder, K), Dec., 116

Air voids
Frost deicer salt scaling testing of concrete: effect of drying and natural weathering (Jacobsen, S, Marchand, J, Boisvert, L, Pigeon, M, and Sellevold, EJ), June, 8

Alkali-aggregate reaction
Prevention of damage due to alkali-aggregate reaction (AAR) in concrete construction—Canadian approach (Thomas, MDA, Hooton, RD, and Rogers, CA), June, 26

Alkali-carbonate reaction
Expandability of solid-volume-reducing reactions of alkali-magnesite and alkali-dolomite (Liang, T and Tang, M), June, 31

Book review
Interfacial Transition Zone in Concrete by Maso (Bentz, DP), June, 55

Brittleness
Do we need a standard concrete fracture mechanics test? (Struble, LJ and Lange, D), Dec., 112

Building codes
Role for fracture mechanics in reinforced concrete design (Hawkins, NM), Dec., 87

Carbonate additions
Carbonate additions to portland cement: the sequel (Hooton, RD), June, 1

E

Editorials
Carbonate additions to portland cement: the sequel (Hooton, RD), June, 1

Confined concrete
Compressive strength of small concrete specimens confined with fiberglass laminates (Larralde, J), June, 17

Construction
Prevention of damage due to alkali-aggregate reaction (AAR) in concrete construction—Canadian approach (Thomas, MDA, Hooton, RD, and Rogers, CA), June, 26

Corrosion
Durability findings from case studies of marine concrete structures (Mackechnie, JR and Alexander, MG), June, 22

Crack propagation
Overview of the fracture mechanics of concrete (Shah, SP), Dec., 79

Damage
Prevention of damage due to alkali-aggregate reaction (AAR) in concrete construction—Canadian approach (Thomas, MDA, Hooton, RD, and Rogers, CA), June, 26

Drying rate
Evaluation of laboratory drying procedures relevant to field conditions for concrete sorptivity measurements (DeSouza, SJ, Hooton, RD, and Bickley, JA), Dec., 59

Thermal properties of commercially available high-strength concretes (Van Geem, MG, Gajda, J, and Dombrowski, K), June, 38

Durability
Durability findings from case studies of marine concrete structures (Mackechnie, JR and Alexander, MG), June, 22

Frost deicer salt scaling testing of concrete: effect of drying and natural weathering (Jacobsen, S, Marchand, J, Boisvert, L, Pigeon, M, and Sellevold, EJ), June, 8

Expansions
Expandability of solid-volume-reducing reactions of alkali-magnesite and alkali-dolomite (Liang, T and Tang, M), June, 31

Explosions
Hydrogen evolution in concrete due to free silicon metal in microsilica (Fidjestøl, P and Jørgensen, O), Dec., 70

Test method for the potential release of hydrogen gas from silica fume (Edwards-Lajnef, M, Altinç, P-C, Wenger, F, Viess, P, and Galland, J), Dec., 64

Fiber-reinforced
Do we need a standard concrete fracture mechanics test? (Struble, LJ and Lange, D), Dec., 112

Fiberglass reinforced plastics
Compressive strength of small concrete specimens confined with fiberglass laminates (Larralde, J), June, 17

Flow length concept
Closure (Pleau, R), Dec., XX
Discussion of “the use of the flow length concept to assess the efficiency of air entrainment with regards to frost durability: Part I—Description of the test method” by Richard Pleau and Michel Pigeon (Snyder, K), Dec., 116

Fracture behavior
Fracture mechanics testing for structural steels (Rolfe, S), Dec., 92

Fracture mechanics
Do we need a standard concrete fracture mechanics test? (Struble, LJ and Lange, D), Dec., 112

Fracture mechanics testing for structural steels (Rolfe, S), Dec., 92

Overview of the fracture mechanics of concrete (Shah, SP), Dec., 79

Role for fracture mechanics in reinforced concrete design (Hawkins, NM), Dec., 87

Fracture toughness
Do we need a standard concrete fracture mechanics test? (Struble, LJ and Lange, D), Dec., 112

© 1997 by the American Society for Testing and Materials

125
Standards for fracture toughness testing of rock and manufactured ceramics: what can we learn for concrete? (Hanson, JH and Ingraffea, AR), Dec., 103

Free silicon metal
Hydrogen evolution in concrete due to free silicon metal in microsilica (Fidjestøl, P and Jørgensen, O), Dec., 70

Freeze-thaw process
Expandability of solid-volume-reducing reactions of alkali-magnesite and alkali-dolomite (Liang, T and Tang, M), June, 31

Frost deicer scaling
Frost deicer salt scaling testing of concrete: effect of drying and natural weathering (Jacobsen, S, Marchand, J, Boisvert, L, Pigeon, M, and Sellevold, EJ), June, 8

High-strength concrete
Thermal properties of commercially available high-strength concretes (Van Geem, MG, Gajda, J, and Dombrowski, K), June, 38

Hydrogen
Hydrogen evolution in concrete due to free silicon metal in microsilica (Fidjestøl, P and Jørgensen, O), Dec., 70

Hydrogen release
Test method for the potential release of hydrogen gas from silica fume (Edwards-Lajnef, M, Altin, P-C, Wenger, F, Viers, P, and Galland, J), Dec., 64

Laboratory testing
Frost deicer salt scaling testing of concrete: effect of drying and natural weathering (Jacobsen, S, Marchand, J, Boisvert, L, Pigeon, M, and Sellevold, EJ), June, 8

Lightweight concrete
Role for fracture mechanics in reinforced concrete design (Hawkins, NM), Dec., 87

Linear elastic fracture mechanics (LEFM)
Standards for fracture toughness testing of rock and manufactured ceramics: what can we learn for concrete? (Hanson, JH and Ingraffea, AR), Dec., 103

Marine concrete structures
Durability findings from case studies of marine concrete structures (Mackenzie, JR and Alexander, MG), June, 22

Masonry
Procedure for testing concrete masonry unit (CMU) mixes (Berg, ER and Neal, JA), June, 3

Microsilica
Hydrogen evolution in concrete due to free silicon metal in microsilica (Fidjestøl, P and Jørgensen, O), Dec., 70

Mix design
Procedure for testing concrete masonry unit (CMU) mixes (Berg, ER and Neal, JA), June, 3

Past-void proximity
Closure (Pleau, R), Dec., XX
Discussion of “the use of the flow length concept to assess the efficiency of air entrainment with regards to frost durability: Part I—Description of the test method” by Richard Pleau and Michel Pigeon (Snyder, K), Dec., 116

Portland cement
Carbonate additions to portland cement: the sequel (Hooton, RD), June, 1
Thermal properties of commercially available high-strength concretes (Van Geem, MG, Gajda, J, and Dombrowski, K), June, 38

Reinforced composite
Compressive strength of small concrete specimens confined with fiberglass laminates (Larralde, J), June, 17

Reinforcement (structures)
Durability findings from case studies of marine concrete structures (Mackenzie, JR and Alexander, MG), June, 22

Relative humidity
Evaluation of laboratory drying procedures relevant to field conditions for concrete sorptivity measurements (DeSouza, SJ, Hooton, RD, and Bickley, JA), Dec., 59

Temperature
Thermal properties of commercially available high-strength concretes (Van Geem, MG, Gajda, J, and Dombrowski, K), June, 38

Short rod specimen
Standards for fracture toughness testing of rock and manufactured ceramics: what can we learn for concrete? (Hanson, JH and Ingraffea, AR), Dec., 103

Silica fume
Test method for the potential release of hydrogen gas from silica fume (Edwards-Lajnef, M, Altin, P-C, Wenger, F, Viers, P, and Galland, J), Dec., 64

Silicon content
Test method for the potential release of hydrogen gas from silica fume (Edwards-Lajnef, M, Altin, P-C, Wenger, F, Viers, P, and Galland, J), Dec., 64

Sorptivity
Evaluation of laboratory drying procedures relevant to field conditions for concrete sorptivity measurements (DeSouza, SJ, Hooton, RD, and Bickley, JA), Dec., 59

Splitting tensile strength
Role for fracture mechanics in reinforced concrete design (Hawkins, NM), Dec., 87

Strength
Compressive strength of small concrete specimens confined with fiberglass laminates (Larralde, J), June, 17

Structural steel
Fracture mechanics testing for structural steels (Rolfe, S), Dec., 92

Test methods
Overview of the fracture mechanics of concrete (Shah, SP), Dec., 79
Procedure for testing concrete masonry unit (CMU) mixes (Berg, ER and Neal, JA), June, 3
Standards for fracture toughness testing of rock and manufactured ceramics: what can we learn for concrete? (Hanson, JH and Ingraffea, AR), Dec., 103
