Introduction

In this section, the relevant portions of the tables of contents of current journals that publish composites articles are reproduced. The entire tables of contents are reproduced for dedicated composites journals, but only the composites-related articles of non-medicated journals are shown. At this time, permission to reproduce the tables of contents has been granted by the following journals.

- AIAA Journal
- Cement and Concrete Composites
- Composites Structures
- Composites Part A: Applied Science and Manufacturing
- Composites Part B: Engineering
- Composites Science and Technology
- Computers and Structures
- Engineering Fracture Mechanics
- Experimental Mechanics
- Experimental Techniques
- International Journal of Fracture
- International Journal of Solids and Structures
- Journal of Adhesion
- Journal of Advanced Materials
- Journal of Applied Mechanics
- Journal of Composites Materials
- Journal of Engineering Materials and Technology
- Journal of Materials Science
- Journal of Reinforced Plastics and Composites
- Journal of Testing and Evaluation
- Mechanics of Composite Materials
- Polymer Composites
- Polymers and Polymer Composites
- SAMPE Journal

The Editor welcomes suggestions for improvements to “Composite Contents,” although library acquisition and accessibility may prevent some additions to the list of journals surveyed.

Dr. Ronald F. Gibson, Contents Editor
Advanced Composites Research Laboratory
Department of Mechanical Engineering
Wayne State University
Detroit, MI 48202

H. Stephen McMinn, Contents Source
Science and Engineering Library
Wayne State University
Failure Analysis of Scarf-Patch-Repaired Carbon Fiber/Epoxy Laminates Under Compression (TN)—C. Soutis and F. Z. Hu, p. 737—

Vol. 38, No. 5, May 2000
Fracture Mode Separation for Delamination in Platelike Composite Structures—Z. Yang, C. T. Sun, and J. Wang, pp. 868—874
Flange Delamination Prediction in Composite Structures with Ply Waviness—J. Li, pp. 893—897

Cement & Concrete Composites

Vol. 21, No. 5/6, 1999
Stress-Strain Curves for Steel-Fiber Reinforced Concrete Under Compression—M. C. Nataraja, N. Dhang, and A. P. Gupta, pp. 383—390
Resistance of Fibre Concrete Slabs to Low Velocity Projectile Impact—K. C. G. Ong, M. Basheer Khan, and P. Paramasivam, pp. 391—402

Vol. 22, No. 2, 2000

Composite Structures

Vol. 46, No. 4, 1999
Micro-Mechanical Approach and Algorithm for the Study of Damage Appearance in Elastomer Composites—M. Brieu and F. Devries, pp. 309—320
A New Finite Element for Buckling Analysis of Laminated Stiffened Plates—Y. V. Satish Kumar and M. Mukhopadhyay, pp. 321—332
On the Stress Analysis of Cross-Ply Laminated Plates and Shallow Shell Panels—K. P. Soldatos and X. Shu, pp. 333—344
Optimisation of Geometrically Non-linear Composite Structures Based on Load-Displacement Control—C. A. Conceição Antônio, pp. 345—356
Post-Buckling Behaviour of Thermoplastic Matrix Composite Laminates Subjected to Pure Shear—P. Gaudenzi, R. Barboni, G. Mormino, and P. Dinardo, pp. 381—386
A Damping Analysis of Composite Laminates Using the Closed Form Expression for the Basic Damping of Poisson’s Ratio—J. H. Yim, pp. 405—412

Indentation Resistance of Sandwich Beams—A. Petras and M. P. F. Sutcliffe, p. 413—

Vol. 48, Nos. 1—3, 2000
Recent Developments in the Modeling and Behavior of Advanced Sandwich Constructions: A Survey—L. Librescu and T. Hause, pp. 1—18
Modeling the Statistical Lifetime of Glass Fiber/Polymer Matrix Composites in Tension—S. L. Phoenix, pp. 19—30
Developments in Thermopiezoelectricity with Relevance to Smart Composite Structures—T. R. Tauchert, F. Ashida, N. Noda, S. Adali, and V. Verijenko, pp. 31—38
Modern Conceptions of Plate Theory—V. V. Vasiliev, pp. 39—48
Closed-Form Analysis of the Thickness Effect of Regular Honeycomb Core Material—W. Becker, pp. 67—70
Detection of Cracks in Ceramic Matrix Composites Based on Surface Temperature—L. W. Byrd and V. M. Birman, pp. 71—78
Influence of Metallic Fillers on the Thermal and Mechanical Behaviour in Composites of Epoxy Matrix—Z. Brito and G. Sánchez, pp. 79—82
Optimization of Fiber Reinforced Composites—G. Duvaut, G. Terrel, F. Léné, and V. E. Verijenko, pp. 83—90
Dynamic Analysis of Orthotropic Shells by the Grid-Characteristic Method—E. G. Evseev and E. V. Morozov, pp. 91—94
Impact Perforation of Thin Stiffened CFRP Panels—M. S. Found, I. C. Howard, and A. P. Paran, pp. 95—98
Simulation of Thermo-Mechanical Behavior and Interfacial Stress of Metal Matrix Composite Under Thermal Shock Process—D. Y. Ju, pp. 113—118
Composite Pressure Vessels with Higher Stiffness—A. A. Krikanov, pp. 119—128
Thermoelasticity of Spatially Reinforced Composite Plates—E. V. Morozov, pp. 129—134
Design of Composite Plates Under Cyclic Loading—A. Muc and Z. Krawiec, pp. 139—144
Buckling and Failure Analysis of FRP Faced Sandwich Plates—A. Muc and P. Zuchara, pp. 145—150
Some Aspects of Ultrasonic Testing of Composites—E. G. Nesvijski, pp. 151—156
The Effect of Strain Rate and Fibre Content on the Poisson’s Ratio of Glass/Epoxy Composites—O. I. Okoli and G. F. Smith, pp. 157—162
Dynamics and Buckling of a Multilayer Composite Plate with Embedded SMA Wires—W. Ostachowicz, M. Krawczuk, and A. Zak, pp. 163—168
High-Order Model of the Stress-Strain State of Composite Bars and Its Implementation by Computer Algebra—V. G. Pisku-
Stress Concentration in Bending of Sandwich Orthotropic Panels Under Point Forces—V. Polyakov, pp. 177–182

A New Approach to Fatigue Analysis in Composites Based on Residual Strength Degradation—D. Revuelta, J. Cuartero, A. Miravete, and R. Clemente, pp. 183–186

Overall Properties of Composites with Physically Non-Linear Discrete Phase—I. Sevostianov, V. E. Verjienko, and C. J. Von Klemperer, pp. 187–196

Mathematical Model of Cavitation During Resin Film Infusion Process—I. Sevostianov, V. E. Verjienko, and C. J. Von Klemperer, pp. 197–204

A Method for Optimally Designing Laminated Plates Subject to Fatigue Loads for Minimum Weight Using a Cumulative Damage Constraint—M. Walker, p. 213–

Vol. 49, No. 4, 2000

Vibrations of and Sound Radiation From Sandwich Plates in Heavy Fluid Loading Conditions—S. V. Sorokin, pp. 219–230

Vibration and Stability of Cross-Ply Laminated Composite Plates According to a Global Higher-Order Plate Theory—H. Matsumaga, pp. 231–244

A Priori vs. A Posteriori Evaluation of Transverse Stresses in Multilayered Orthotropic Plates—E. Carrera, pp. 245–250

Effects of Truncation and Elimination on Composite Fatigue Life—T. Nyman, H. Ansells and A. Blom, pp. 275–286

Dynamic Equilibrium Equations of Composite Anisotropic Beams Considering the Effects of Transverse Shear Deformations and Structural Damping—C.-N. Chen, pp. 287–304

Analysis of Active Damping in Composite Laminate Cylindrical Shells of Revolution with Skewed PVDF Sensors/Actuators—C. Saravanan, N. Ganesan, and V. Ramamurti, p. 305–

Vol. 49, No. 1, 2000

Fabrication and Testing on Thin Composite Isogrid Stiffened Panel—T. D. Kim, pp. 21–28

A General Solution for Stress Resultants and Moments Around Holes in Unsymmetric Laminates—V. G. Ukadaonker and D. K. N. Rao, pp. 27–40

Thermal Buckling Analysis of Skew Fibre-Reinforced Composite and Sandwich Plates Using Shear Deformable Finite Element Models—T. Kant and C. S. Babu, pp. 77–86

Overall Behaviour of Singly Curved Shallow Sandwich Panels: The Case of General Boundary Conditions—S. Skvortsov, E. Bozhevolnaya, and A. Kikdegaard, p. 95–

Vol. 49, No. 2, 2000

Experimental Study of CFRP-Restressed High-Strength Concrete Bridge Beams—F. Stoll, J. E. Saliba, and L. E. Casper, pp. 191–200

Elastic-Plastic Stress Analysis in Thermoplastic Composite Laminated Plates Under In-Plane Loading—R. Özcan, pp. 201–208

Free-Edge Strength Analysis in Composite Laminates by the Extended Kantorovich Method—H. S. Kim, M. Cho, and G.-I. Kim, p. 229–

Experimental and Theoretical Analyses of First-Ply Failure of Laminated Composite Pressure Vessels—R. R. Chang, p. 237–

Vol. 49, No. 3, 2000

Finite Element Analysis of Composite Pressure Vessels with a Load Sharing Metallic Liner—M. Z. Kabir, pp. 247–256

An Asymptotic Characterisation of the Moisture Diffusion in Polymer Matrix Composites with Cyclic Environmental Conditions—E.-A. Adda-Bedia, W. S. Han, and G. Verchery, pp. 269–274

Boundary Value Problems for Unsymmetric Laminates, Occupying a Region with Elliptic Contour—D. D. Zakharov and W. Becker, pp. 275–284

Process Induced Stress for Woven Fabric Thick Section Composite Structures—X. Huang, J. W. Gillespie, Jr., and T. Bogetti, pp. 303–312
Investigation of the Rotary Inertia and Shear Deformation Effects on the Out-of-Plane Bending and Torsional Natural Frequencies of Laminated Beams—V. Yildirim and E. Kiral, pp. 313–320

Predicting the Penetration and Perforation of FRP Laminates Struck Normally by Projectiles with Different Nose Shapes—H. M. Wen, pp. 321–330

Strain Monitoring in Composite Patched Structures—F. Findik, N. Mrad, and A. Johnston, pp. 331–338

Composites

Part A: Applied Science and Manufacturing

Vol. 31A, No. 1, 2000

Resistance of Glass-Fibre Reinforced Polymer Composites to Increasing Compressive Strain Rates and Loading Rates—M. Z. Shah Khan, G. Simpson, and E. P. Gellert, pp. 57–68

Vol. 31A, No. 2, 2000

The Effect of Delaminations Induced by Transverse Cracks and Splits on Stiffness Properties of Composite Laminates—M. Kashtalyan and C. Soutis, pp. 107–120

Bending Stiffness of Composite Plates with Delamination—J. P. Hou and G. Jeronimidis, pp. 121–132

Comparison of Stiffness Measurements and Damage Investigation Techniques for a Fatigued and Post-Impact Fatigued GFRP Composite Obtained by RTM Process—Ph. Margueres, F. Meraghni, and M. L. Bengzeggagh, pp. 151–164

Evaluation of Mechanical Behavior of CFRC Transverse to the Fiber Direction at Room and Cryogenic Temperature—M. Husain, A. Nakahira, S. Nishijima, and K. Niihara, p. 173–

Vol. 31A, No. 3, 2000

The Design and Fabrication of an Alumina Reinforced Aluminum Composite Material—X. X. Yu and W. B. Lee, pp. 259–272

The Mechanical Properties of a Composite Manufactured from Non-Fibrous Vegetable Tissue and PVA—D. G. Hepworth and D. M. Bruce, p. 283–

Vol. 31A, No. 4, 2000

Shear Deformation and Micromechanics of Woven Fabrics—U. Mohammed, C. Lekakou, L. Dong, and M. G. Bader, pp. 299–308

Identification of the Through-Thickness Moduli of Thick Composites from Whole-Field Measurements Using the Iosipescu Fixture: Theory and Simulations—F. Pierron and M. Grédiac, pp. 309–318

Modelling Component Cost in Compression Moulding of Thermoplastic Composites and Sandwich Components—M. Åkermo and B. T. Åström, pp. 319–334

Stiffness Degradation in Cross-Ply Laminates Damaged by Transverse Cracking and Splitting—M. Kashitalyan and C. Soutis, pp. 335–352

Calcium Carbonate Filled Polyethylene: Correlation of Hardness and Yield Stress—J. Suwanprateeb, pp. 353–360

Resin Transfer Molding Process Optimization—M. Y. Lin, M. J. Murphy, and H. T. Hahn, pp. 361–372

Formation of Al2Ti and Al2O3 from an Al—TiO2 System for Preparing In-situ Aluminium Matrix Composites—C. F. Feng and L. Froyen, p. 385–

Vol. 31A, No. 5, 2000

Micromechanical Modeling Approaches for the Stiffness and Strength of Knitted Fabric Composites: A Review and Comparative Study—Z. M. Huang and S. Ramakrishna, p. 479–

Composites

Part B: Engineering

Vol. 30B, No. 6, 1999

Axisymmetric Vibrations of Concentric Dissimilar Isotropic Composite Plates—J. B. Greenberg and Y. Stavsky, pp. 553–568

Modeling of Smart Composite Box Beams with Nonlinear Induced Strain—A. Chattopadhyay, H. Gu, and Q. Liu, pp. 603–612

Vol. 30B, No. 7, 1999

Special Issue: Interdisciplinary Approach to Smart Composite Structures and Materials

Processing and Properties of Nanophase SiC/Si₃N₄ Composites—A. W. Weimer and R. K. Bordia, pp. 647–656

Diamond-like Carbon Film Deposition on PZT Ferroelectrics and YBCO Superconducting Films Using KrF Excimer Laser Deposition—K. Ebihara, F. Mitsugi, M. Yamazato, and Y. Yamagata, pp. 685–690

Development of the Boundary Element Method for 2D Piezoelectricity—M. Denda and J. Lua, pp. 699–708

On Overall Properties of Smart Piezoelectric Composite—N. Yu, pp. 709–712

Health Monitoring and Active Control of Composite Structures Using Piezoceramic Patches—M. J. Schulz, P. F. Pai, and D. J. Inman, pp. 713–726

Structural Integrity Issues During Piezoelectric Vibration Suppres-

sion of Composite Structures—G. S. Agnes and S. Mall, pp. 727–738

Control of the Dynamic Characteristics of Passive Magnetic Composites—J. Oh, M. Ruzzene, and A. Baz, pp. 739–752

Vol. 30B, No. 8, 1999

Local Buckling of Stitched Composite Laminate—T. S. Pan and P. D. Herrington, pp. 833–840

Influence of Autofrettage on Metal Matrix Composite Reinforced Gun Barrels—R. S. Salzar, pp. 841–848

Vol. 31, No. 1, 2000

Ultrasonic Evaluation of Matrix Damage in Impacted Composite Laminates—F. Aymérich and S. Meili, pp. 1–6

An Evaluation of Different Models for Prediction of Elastic Properties of Woven Composites—J. Bystrom, N. Jekabsons, and J. Varma, pp. 7–20

Aspects of Residual Thermal Stress/Strain in Particle Reinforced Metal Matrix Composites—G. Meijer, F. Ellyin, and Z. Xia, pp. 29–37

Finite Element Analysis of Pin-Loaded Composite Laminates by Connecting Independently Modeled Subdomains—E. S. Shin and S. J. Kin, pp. 47–56

Elastic Moduli of Laminated Composites Revisited by Using Statistical Analysis—H. L. Yeh and H. Y. Yeh, pp. 57–64

Vol. 31B, No. 2, 2000

Modeling of Progressive Damage in Aligned and Randomly Oriented Discontinuous Fiber Polymer Matrix Composites—H. K. Lee and S. Simunovic, pp. 77–86

Strengthening Concrete Beams for Shear Using CFRP-Materials: Evaluation of Different Application Methods—B. Töljsten and L. Elfgren, pp. 87–96

3D Finite Element Analysis of Tensile Notched Strength of 2/2 Twill Weave Fabric Composites with Drilled Circular Hole—S.-P. Ng, K. J. Lau, and P. C. Tse, pp. 113–132

Analytical Simulation of Strength Size Effect in Composite Materials—A. Tabiei and J. Sun, pp. 133–140
On a Modern Rotation Theory of Thin-Walled Composite Beams—F. Fraternali and L. Feo, pp. 141–

Vol. 31, No. 3, 2000
Impact Behaviour of Heat-Resistant Toughened Composites—G. Sala, pp. 161–173
The Influence of Processing Variables on Injection Molded In Situ Composites Based on Polyphenylene Sulfide and a Melt Processable Glass—R. T. Young and D. G. Baird, pp. 209–221
Changing the Toughness of Graphite Fiber/Resin Based Composites by Changing Their Internal Structure—W. Jordan, pp. 245–252

Composites Science and Technology
Vol. 59, No. 15, 1999
Effects of Laminate Thickness and Reinforcement Type on the Impact Behaviour of E-Glass/Polyester Laminates—L. S. Sutherland and C. Guedes Soares, pp. 2243–2260
Evaluation of the Tensile Strength of Cement-Based Advanced Composite Wrapped Specimens—H. A. Toutanji, pp. 2261–2268
Imperfect Interlaminar Interfaces in Laminated Composites: Bending, Buckling, and Transient Responses—V. Q. Bui, E. Marechal, and H. Nguyen-Dang, pp. 2269–2278

Vol. 59, No. 16, 1999
The Influence of Fibre Properties of the Performance of Glass-Fibre-Reinforced Polyamide 6.6—J. L. Thomason, pp. 2315–2328
Damage Development in Carbon/Epoxy Laminates Under Quasi-Static and Dynamic Loading—M. G. Stout, D. A. Koss, C. Liu, and J. Idasen, pp. 2339–2350
Stabilisation in and Rejection of Ceramic Particles from Molten Aluminium Alloy: Modelling and Experimental Testing—V. M. Kevorkjian, pp. 2363–2374

Vol. 60, No. 1, 2000
The Effects of Matrix and Interface on Damage in GRP Cross-Ply Laminates—B. A. Sjögren and L. A. Berglund, pp. 9–22
Non-Destructive Detection of Fatigue Damage in Thick Composites by Pulse-Echo Ultrasonics—A. P. Mouritz, C. Townsend, and M. Z. Shah Khan, pp. 23–32
The Evaluation of Impact Damage in a Composite Plate with a Hole—R. K. Luo, pp. 49–58
A New Cumulative Fatigue Damage Model for Fibre-Reinforced Plastics—W. X. Yao and N. Himmel, pp. 59–64
The Solution of an Inhomogeneity in a Finite Plane Region and Its Application to Composite Materials—J. Wang, J. H. Andresen, and B. L. Karihaloo, pp. 75–82
Photoelastic Evaluation of Metallic Inserts of Optimised Shape—A. R. Rispler, G. P. Steven, and L. Tong, pp. 95–106
The Influence of Surface Roughness on the Mechanical Strength Properties of Machined Short-Fibre-Reinforced Thermoplastics—E. Eriksen, pp. 107–114
Three-Point Beam Impact Tests on T300/914 Carbon-Fibre Composites—S. R. Hallett, pp. 115–124
Imperfect Interlaminar Interfaces in Laminated Composites: Inter-

A Simple Approach to the Evaluation of Fiber/Matrix Interfacial Shear Strength and Fracture Toughness—S. Y. Zhang, pp. 145–148

Vol. 60, No. 2, 2000

Quantitative Determination of Morphological Features of Triaxially Braided Composites by the Use of Machine Vision—B. Lian, L. Jiang, J. J. McGrath, and J. Jaranson, pp. 159–166

Initiation and Growth Criteria for Transverse Matrix Cracks in Composite Laminates—P. Gudmundsson and J. Alpmann, pp. 185–198

The Effect of Fibre-Content Gradient on the Mechanical Properties of Glass-Fibre-Mat/Polypropylene Composites—N.-J. Lee and J. Jang, pp. 209–218

Compressive Strengths of Single Carbon Fibres and Composite Strands—M. Shioya and M. Nakatani, pp. 219–230

The Application of a Ply-Refinement Technique to the Analysis of Microscopic Deformation in Interlaminar Toughened Laminates with Transverse Cracks—N. Takeda, L. N. McCartney, and S. Ogihara, pp. 231–240

Anodic Surface Oxidation for Pitch-Based Carbon Fibers and the Interfacial Bond Strengths in Epoxy Matrices—A. Fukunaga and S. Ueda, pp. 249–254

Initiation of a Mode-II Interlaminar Crack from an Insert Film in the End-Notched Flexure Composite Specimen—M. Todo, P.-Y. B. Jar, and K. Takahashi, pp. 263–272

Apparent Strength Scaling in Continuous Fiber Composite Laminates—J. A. Lavoie, C. Soutis, and J. Morton, pp. 283–300

Electrical Resistance Curing of Carbon-Fibre/Epoxy Composites—C. Joseph and C. Viney, p. 315–

Vol. 60, No. 3, 2000

Prediction of Energy Release Rate Due to the Growth of an Interface Crack by Variational Analysis—W. Wu, I. Verpoest, and J. Varna, pp. 351–360

Experimental Studies on the Interfacial Shear-Transfer Mechanism in Discontinuous Glass-Fibre Composites—J. L. Stanford, P. A. Lovell, C. Thongpin, and R. J. Young, pp. 361–366

Characterisation of Indentation Damage in 090 Lay-Up T300/914 CFRP—D. D. Symons, pp. 391–402

Experimental Study of the Rate-Sensitivity of SiCp/Al Composites and the Establishment of a Dynamic Constitutive Equation—Y. Zhou and Y. Xia, pp. 403–410

Effects of Heat Treatment on the Mechanical Properties of Kevlar-29 Fibre—C. Y. Yue, G. X. Sui, and H. C. Looi, pp. 421–428

The Reinforcement of an Age-Hardenable Al-Cr Matrix Alloy In Situ and by SiC/Al2O3 Particles: Tailoring of the Interface—S. Datta, N. R. Bandyopadhyay, S. Bandyopadhyay, and M. K. Banerjee, pp. 451–456

Toughness Improvement of Carbon-Fibre/Polybenzoxazine Composites by Rubber Modification—J. Jang and H. Yang, pp. 457–464

Vol. 60, No. 4, 2000

The Mechanical Properties of Composites Reinforced with Woven and Braided Fabrics—Z. M. Huang, pp. 479–498

Dimensionality and Size Effects on the Strength of Fiber-Reinforced Composites—W. A. Curtin, pp. 543–552
A Model of Fatigue Delamination in Composites—J. Schön, pp. 553–558

Variation of PEEK Matrix Crystallinity in APC-2 Composite Subjected to Large Shearing Deformations—F. Lagattu and M. C. Lafarie-Frenot, pp. 605–612

An Elastic-Plastic Stress Analysis in a Thermoplastic Composite Cantilever Beam—O. Sayman and M. Kayrıcı, pp. 623–632

Vol. 60, No. 5, 2000

Processing and Characterization of 3D Woven and Braided Thermoplastic Composites—W. S. Kuo and J. Fang, pp. 643–656

Modeling the Stress/Strain Behavior of a Knitted Fabric-Reinforced Elastomer Composite—Z. M. Huang, S. Ramakrishna, and A. A. O. Tay, pp. 671–691

A Post-Processor Approach for Stress Analysis of Woven Textile Composites—K. Woo and J. D. Whitcomb, pp. 693–704

Impact and Delamination Failure of Woven-Fabric Composites—J. K. Kim and M. L. Sham, pp. 745–761

Vol. 60, No. 6, 2000

The Dynamic Behavior of Metal-Matrix Composites Under Low-Velocity Impact—H. W. Nam, G. A. Aggag, T. Takahashi, and K. S. Han, pp. 817–824

A Method of Extracting Weibull Survival Model Parameters from Filament Bundle Load/Strain Data—T. S. Creasy, pp. 825–832

A Comparison of Aluminium-Based Metal-Matrix Composites Reinforced with Coated and Uncoated Particulate Silicon Carbide—A. M. Davidson and D. Regener, pp. 865–870

Electroflocking Technique in the Fabrication and Performance Enhancement of Fiberreinforced Polymer Composites—V. S. Mironov and M. Park, pp. 927–934

A New Triangular Stiffened Plate Element for Laminate Analysis—Y. V. Satish Kumar and M. Mukhopadhyay, pp. 935–944

Computers & Structures

Vol. 74, No. 2, October 1999

A Micromechanical Approach for the Analysis of Damage in Laminated Composite Structures—R. Luciano and R. Zinno, pp. 201–214

Vol. 74, No. 4, January 2000

Free-Vibration Analysis of Thin/Thick Laminated Structures by Layer-Wise Shell Models—Y. Başar and M. H. Omurtag, pp. 409–428

Vol. 74, No. 5, January 2000

Long-Term Behavior of Composite Girder Bridges—H.-G. Kwak and Y.-J. Seo, pp. 583–600
Vol. 74, No. 6, February 2000

Vol. 75, No. 1, February 2000

Vol. 75, No. 2, March 2000

Vol. 75, No. 4, March 2000
A Finite Element Model for the Analysis of Stiffened Laminated Plates—E. A. Sadek and S. A. Tawfik, pp. 369–384

Vol. 76, No. 1–3, April 2000
Modelling and Analysis of Multi-Ply Torispheres Draped from Woven Carbon Fabric—J. Blachut, pp. 1–10
Interlaminar Fracture Behaviour of Laminated Composites—R. Rikards, pp. 11–18
Mechanics of Fibre-Reinforced Cementitious Composites—B. L. Karibaloo and J. Wang, pp. 19–34
Durability Analysis of Polymer Matrix Composites for Structural Applications—A. H. Cardon, Y. Qin, and C. Van Voss, pp. 35–42
Nonlinear and Structural Aspects of Transitions From Damage to Fracture in Composites and Structures—O. B. Naimark, M. Davydova, O. P. Zuo, and S. V. Uvarov, pp. 67–76
Semiconductor Column-Base Connections in Pultruded GRP Frame Structures—G. J. Turvey and C. Cooper, pp. 77–88
Influence of Bolt Spacing and Degree of Anisotropy in Single-Lap Joints—B. Sergeev, E. Madenci, and D. R. Ambur, pp. 89–104
Comparison Between Longitudinal Tensile Characteristics of Thin and Thick Thermoset Composite Laminates: Influence of Curing Conditions—P. Olivier and M. Cavaro, pp. 125–138
High Strain Rate Deformation Behavior of a Continuous Fiber Reinforced Aluminum Metal Matrix Composite—M. Guden and I. W. Hall, pp. 139–144
Analogy Between Heat and Moisture Thermohygro-Mechanical Tailoring of Composites by Taking into Account the Second Sound Phenomenon—A. Szekeres, pp. 145–152
Creep Rupture of a GFRP Composite at Elevated Temperatures—K. D. Dutta and D. Hui, pp. 153–162
Reliability of Composite Structures—Impact Loading—L. Guillaumat, pp. 163–172
Macro-Failure Criterion for the Theory of Laminated Composite Structures with Free Edge Delaminations—A. Borovkov, V. Palmov, N. Banichuk, V. Saurin, F. Barthold, and E. Stein, pp. 195–204
Design of Composite Structures Under Cyclic Loads—A. Muc, pp. 211–218
Probabilistic Strength Analysis of Rectangular FRP Plates Using Monte Carlo Simulation—H. K. Jeong and R. A. Shenoi, pp. 219–236
Sudden Drop Phenomena in Natural Frequencies of Composite Plates or Panels with a Central Stiffening Plate Strip—U. Yucoeul and V. Ozerciyes, pp. 247–262
A Family of Shear-Deformable Shell Finite Elements for Composite Structures—B. Brank and E. Carrera, pp. 287–298
Adaptive Composites Modelling and Application in Panel Flutter and Noise Suppression—A. Suleman, pp. 365–378
Shape Design Sensitivity Analysis for Fracture Conditions—V. V. Saurin, pp. 399–406
Cascading—An Approach to Robust Material Optimization—M. Kočvara, J. Zowe, and A. Nemirovski, pp. 431–432

Engineering Fracture Mechanics
Vol. 64, No. 6, December 1999
Analysis of an Interface Crack for a Functionally Graded Strip Sandwiched Between Two Homogeneous Layers of Finite

Vol. 65, No. 2/3, January-February 2000

Vol. 65, No. 4, March 2000

Vol. 65, No. 5, March 2000

Experimental Mechanics

Vol. 39, No. 4, December 1999

Vol. 40, No. 1, March 2000
Effects of Joining Techniques on Impact Perforation Resistance of Assembled Composite Plates—D. Liu and B. B. Raju, pp. 46–53
Discussion of “Novel Procedure for Complete In-plane Composite Characterization Using a Single T-shaped Specimen”—R. Prabhakaran, pp. 96–97

Experimental Techniques

Vol. 24, No. 2, March/April 2000

International Journal of Fracture

Vol. 95, No. 1/4, 1999
Size Effect in Fracture of Unidirectional Composite Plates—G. J. Dvorak and A. P. Suvorov, pp. 89–101
Is There a Thickness Effect on Compressive Strength of Unnotched Composite Laminates?—I. M. Daniel and H. M. Hsiao, pp. 143–158

Vol. 96, No. 1, 1999

Vol. 96, No. 4, 1999
Optimizing the Design of Particulate Composites for Maximum Fracture Resistance Through Modeling—D. L. Davidson, pp. 359–370

Vol. 97, No. 1/4, 1999
The Visco-Damage Mechanical Response of Swirl-Mat Composites—L. V. Smith and Y. J. Weitsman, pp. 301–319

Vol. 98, No. 1, 1999
The Interface Crack Problem for Bonded Piezoelectric and Orthotropic Layers Under Antiplane Shear Loading—F. Narita and Y. Shindo, pp. 87–101

Vol. 98, No. 2, 1999
Study on Fracture Strain of Discontinuously Reinforced Metal Matrix Composites—G. F. Quan, Y. J. Song, M. J. Tu, et al., pp. 103–110

Vol. 98, No. 3/4, 1999
The Mixed Mode Crack Problem in an Inhomogeneous Orthotropic Medium—M. Ozturk and F. Erdogan, pp. 243–261
Nonplanar Interfacial Cracks in Anisotropic Bimaterials—M. A. Kattis, pp. 313–327
Crack-Tip Caustics at a Bi-Material Interface—G. A. Papadopoulos, pp. 329–342
Vibrations of Layered Beams Under Conditions of Damaging and Slipping Interfaces—C. Adam and F. Ziegler, pp. 393–406

Vol. 99, No. 1/2, 1999
Intersonic Crack Propagation in an Orthotropic Material—K. B. Broberg, pp. 1–11
On 3D Cracks Intersecting a Free Surface in Laminated Composites—D. Leguillon and E. Sanchez-Palencia, pp. 25–40

Vol. 99, No. 3, 1999

Vol. 100, No. 1, 1999
A Method Based on Singularity Theory to Predict Edge Delamination of Laminates—D. Leguillon, pp. 105–120

Vol. 100, No. 3, December 1999
Finite Element Analysis of Micromechanical Failure Modes in a Heterogeneous Ceramic Material System—J. Zhai and M. Zhou, pp. 161–180

International Journal of Solids and Structures

Vol. 37, No. 4, November 1999

The Generalized Plane Strain Deformations of Thick Anisotropic Composite Laminated Plates—S. S. Vel and R. C. Batra, pp. 715–734

Determination of Interior Point Stresses in Two Dimensional BEM Thermoelastic Analysis of Anisotropic Bodies—Y. C. Shiai and C. L. Tan, p. 809–

Vol. 37, No. 6, November 1999
Development of Special Multi-Material Elements—A. K. Soh, pp. 899–918

Modelling of the Mechanical Behavior and Damage Processes of Fibrous Ceramic Matrix Composites: Application to a 2-D SiC/SiC/G. Camus, p. 919–942

Three-Dimensional Green's Functions in Anisotropic Piezoelectric Solids—E. Pan and F. Tonon, p. 943–

Vol. 37, No. 7, November 1999
Analysis of Elastically Coupled Thick-Walled Composite Blades—O. Rappel and O. Rand, pp. 1019–1044

Predictive Potentialities of a Cylindrical Structural Cell for Particulate Elastomeric Composites—V. V. Moshev and L. L. Kozhevnikova, p. 1079–

Vol. 37, No. 8, December 1999
Effects of Periodic and Localized Imperfections on Struts on Non-linear Foundations and Compression Sandwich Panels—M. A. Wadeco, pp. 1191–1210

Vol. 37, No. 9, December 1999
Cracks Problem for Non-Homogeneous Composite Material Subjected to Dynamic Loading—B. L. Wang, J. C. Han, and S. Y. Du, pp. 1251–1274

Stress-Strain Fields and the Effectiveness Shear Properties for Three-Phase Composites with Imperfect Interface—Y. Wu, Z. Ling, and Z. Dong, pp. 1275–1292

Vol. 37, No. 10, December 1999

Dynamics of Delaminated Beams—H. Luo and S. Hanagud, p. 1501–

Vol. 37, No. 11, December 1999
Micromechanics Modeling of Composite with Ductile Matrix and Shape Memory Alloy Reinforcement—M. Cherkaiou, Q. P. Sun, and G. Q. Song, pp. 1577–1594

Dynamic Fundamental Solutions for Transversely Isotropic Piezo-
electric Materials of Crystal Class 6 mm—C. H. Daros and H. Antes, p. 1639–

Vol. 37, No. 12, December 1999
Composite Failure Under Combined Compression and Shear—T. J. Vogler, S.-Y. Hsu, and S. Kyriakides, pp. 1765–1792

Vol. 37, No. 13, January 2000
The In-Plane Non-Linear Compression of Regular Honeycombs—H. X. Zhu and N. J. Mills, p. 1931–

Vol. 37, No. 14, January 2000
Singularity in Rotating Orthotropic Discs and Shells—R. Jain, K. Ramachandra, and K. R. Y. Simha, pp. 2035–2058

Vol. 37, No. 15, January 2000

Vol. 37, No. 16, January 2000
Exact Eigenvalue Correspondences Between Laminated Plate Theories Via Membrane Vibration—Z.-Q. Cheng and S. Kitipornchai, pp. 2253–2264

Vol. 37, No. 17, February 2000
Modeling of Compressive Failure in Fiber Reinforced Composites—K. Niu and R. Talreja, pp. 2405–2428

Fracture Analysis of Cracked Orthotropic Skin Panels with Riveted Stiffeners—J. R. Yeh and M. Kulak, p. 2473–

Vol. 37, No. 18, February 2000

Vol. 37, No. 19, February 2000

Vol. 37, No. 20, March 2000
Micromodule Initiation from a Hole and from the Free Edge of a Fibre Composite—N. A. Fleck, D. Liu, and J. Y. Shu, pp. 2757–2776

Vol. 37, No. 21, March 2000
Strength Prediction of Composite Laminates with Multiple Elliptical Holes—X. W. Xu, H. C. Man, and T. M. Yue, pp. 2887–2900

Closed-Form Solutions for the Magnetoelastic Coupling Coefficients in Fibrous Composites with Piezoelectric and Piezomagnetic Phases—T.-L. Wu and J. H. Huang, p. 2981–
Vol. 37, No. 23, March 2000

On the Thermo-Elasto-Statics of Composites with Coated Randomly Distributed Inclusions—V. A. Buryachenko and F. G. Rammerstorfer, pp. 3177–3200

On the Electroelastic Behaviour of a Thin Piezoelectric Actuator Attached to an Infinite Host Structure—X. D. Wang and S. A. Meguid, p. 3231–3252

On Singularities in Composite Piezoelectric Wedges and Junc-
tions—X.-L. Xu and R. K. N. D. Rajapakse, p. 3253–

Vol. 37, No. 24, March 2000

Some Contact Problems of Anisotropic Elastodynamics: Integral Characteristics and Exact Solutions—F. M. Borodich, pp. 3345–3374

Vol. 37, No. 25, March 2000

Failure of Laminated Composites at Thickness Discontinuities Under Complex Loading and Elevated Temperatures—S. Lee and W. G. Knapp, pp. 3479–3502

An Alternative Determination of Transverse Shear Stiffnesses for Sandwich and Laminated Plates—H. Altenbach, p. 3503–

Vol. 37, No. 26, March 2000

Vol. 37, No. 27, April 2000

Nonlinear Thermoelastic Analysis of Composite Panels under Non-uniform Temperature Distribution—A. Barut, E. Madenci, and A. Teslner, pp. 3681–3714

Experimental Investigation of the Quasi-Static Fracture of Functionally Graded Materials—H. Ji, J. Lambros, B. A. Cheese-
man, and M. H. Santare, pp. 3715–3732

Vol. 37, No. 29, April 2000

Experimental Verification of Buckling-Mode Interaction in Inter-

Vol. 37, No. 30, April 2000

Micromechanical Modeling of Transient Waves from Matrix Cracking and Fiber Fracture in Laminated Beams—M. Åberg and P. Gudmundson, pp. 4083–4102

A Coupled Micro-Macromechanical Analysis of Hygrothermo-
elastic Composites—J. Aboudi and T. O. Williams, p. 4149–

Vol. 37, No. 31, May 2000

Weak Interface in Long Fiber Composites—S. Lenci and G. Men-
ditto, pp. 4239–4260

Cylindrical Bending of Angle-Ply Laminates Subjected to Different Sets of Edge Boundary Conditions—X.-P. Shu and K. P. Soldatos, p. 4289–

Vol. 37, No. 32, May 2000

Three-Dimensional Transient Piezothermoelasticity in Function-ally Graded Rectangular Plate Bonded to a Piezoelectric Plate—Y. Ootao and Y. Tanigawa, pp. 4377–4402

Interface Forces in Composite Steel-Concrete Structure—E. J. Sapountzakis and J. T. Katsikadelis, p. 4455–

Journal of Adhesion

Vol. 71, No. 4, 1999

Journal of Advanced Materials

Vol. 32, No. 1, January 2000

Using ESCA and SIMS in Composites Manufacturing—J. T. Cherian and D. G. Castner, pp. 28–33

Fabrication and Compressive Strength of the Composite Attach-
ment Fitting for Launch Vehicle—A. Hou and K. Gramoll, pp. 39–45

Computational Simulation of Continuous Fiber Reinforced Ce-

The Influence of SiC Particle Size on Microstructure and Mechanical Properties of Al2O3-SiC Nanocomposites—H. Wang, L. Gao, and J. Guo, p. 60–

Vol. 32, No. 2, April 2000

Ultrafine and Nanophased Powders as the Fillers in Composite Coatings—I. Uvarova, pp. 26–31

Journal of Applied Mechanics

Vol. 66, No. 4, December 1999

Consistent Hashin-Shtrikman Bounds on the Effective Properties of Periodic Composite Materials—P. Bisegna and R. Luciano, pp. 858–866

Application of Finite-Part Integrals to Planar Interfacial Fracture Problems in Three-Dimensional Bimaterials—M.-C. Chen, N.-
A. Noda, and R.-J. Tang, pp. 885–890

A Strip Element Method for Analyzing Wave Scattering by a Crack in an Immersed Composite Laminate—G. R. Liu, Z. C.
Xi, K. Y. Lam, and H. M. Shang, pp. 898–903

The Onset of Tear Propagation at Slits in Stressed Uncoated Plain Weave Fabrics—T. A. Godfrey and J. N. Rossettos, pp. 926–933

Transverse Normal Stress Effects in Multilayered Plates—E. Carrera, p. 1004–

A Numerical Study on the Free Vibration of Symmetric Cross-
Ply Laminated Cylindrical Helical Springs—V. Yildirim, pp. 1040–1042
Journal of Composite Materials

Vol. 33, No. 19, 1999

A Micromechanical Approach to the Tensile Strength of a Knitted Fabric Composite—Z. M. Huang, S. Ramakrishna, and A. O. A. Tay, pp. 1758–1791

Ductility of Concrete Beams Reinforced with FRP Bars and Steel Fibers—S. H. Alsayed and A. M. Alhozaimy, pp. 1792–1806

Vol. 33, No. 20, 1999

Vol. 33, No. 21, 1999

Vol. 33, No. 22, 1999

Failure Investigation of Graphite/Polyimide Fabric Composites at Room and Elevated Temperatures Using the Biaxial Losipescu Test—K. Searles, G. Odegard, M. Kumosa, et al., pp. 2038–2079

Vol. 34, No. 1, 2000

Determination of Complex Compliances of Fibrous Polymeric Composites—A. P. Wilczynski and M. Klasztorny, pp. 2–26

Lamb Wave Evaluation of the Effects of Thermal-Mechanical Aging on Composite Stiffness—M. D. Seale and E. I. Madaras, pp. 27–38

On the Linear Viscoelasticity of Thin-Walled Laminated Composite Beams—P. Z. Qiao, E. J. Barbero, and J. F. Davalos, pp. 39–68

Vol. 34, No. 2, 2000

A Numerical Investigation of Three Dimensional Effects in Cracked Orthotropic Plates—S. Prabhu and J. Lambros, pp. 116–134

Interface Failure at Ply Drops in CFRP/Sandwich Panels—O. T. Thomsen, F. Mortensen, and Y. Frostig, pp. 135–157

The Influence of Fibre Properties on the Properties of Glass-Fibre-Reinforced Polyamide 6.6—J. L. Thomason, pp. 158–172

Vol. 34, No. 3, 2000

Ultrasonic and Interlaminar Properties of Highly Porous Composites—A. P. Mouritz, pp. 218–239

Strength Prediction of Plain Woven Fabrics—M. G. Kollegal and S. Sridharan, pp. 240–257

Vol. 34, No. 4, 2000

Inelastic Response of a Woven Carbon/Copper Composite—Part II: Micromechanics Model—B. A. Bednarcyk and M. J. Pindera, pp. 299–331

Design and Analysis of Composite Pipe Joints Under Tensile Loading—C. D. Yang, pp. 332–349

Vol. 34, No. 5, 2000

Vol. 34, No. 6, 2000
Application of Tsai-Wu Criterion to Notched and Unnotched Composite Laminates Under Torque Loading—X. L. Gong, X. J. Gong, and A. Laksimi, et al., pp. 460–478
Preforming Analysis of Biaxial Braided Fabrics Sleevng on Pipes and Ducts—S. J. Li, J. S. Tsai, and L. J. Lee, pp. 479–501
Concise Derivation of Formulas for 3D Sublaminate Homogenization—J. Whitcomb and J. Noh, pp. 522–535

Vol. 34, No. 7, 2000
Buckling Analysis of Elliptically Delaminated Composite Laminates with Consideration of Partial Closure of Delamination—H. Sekine, N. Hu, and M. A. Kouchakzadeh, pp. 551–574
Measurement of Residual Stresses in Layered Composites by Compliance Method—N. Ersoy and O. Vardar, pp. 575–598
Hydrostatic Pressure Effect on the Fracture Toughness of Unidirectional (0-deg) Graphite/Epoxy Laminated Composites—K. Y. Rhee, pp. 599–613

Vol. 34, No. 8, 2000

Vol. 34, No. 9, 2000
Study of a Three-Point Bending Specimen for Shear Characterisation of Sandwich Cores—G. Caprino and A. Langella, pp. 791–814

Journal of Engineering Materials and Technology—Transactions of the ASME
Vol. 122, No. 1, January 2000
Interfacial Stresses and Void Nucleation in Discontinuously Reinforced Composites—T. C. Tszeng, pp. 86–92

Journal of Materials Science
Vol. 34, No. 24, December 1999
Characterization of Strength and Microstructure in Deformation Processed Al-Mg Composites—K. Xu, A. M. Russell, L. S. Chumbley, et al., pp. 5955–5959
Investigation into Stress Transfer Characteristics in Alumina-Fibre/Epoxy Model Composites Through the Use of Fluorescence Spectroscopy—H. Mahiou, A. Beakou, and R. J. Young, pp. 6069–6080
In Situ Synthesis of TiN-Reinforced Si3N4 Matrix Composites using Si and Sponge Ti Powders—B. T. Lee, and H. D. Kim, pp. 6169–6176
A Dual-Phase-Lag Diffusion Model for Interfacial Layer Growth in Metal Matrix Composites—J. K. Chen, J. E. Beraun, and D. Y. Tzou, pp. 6183–6187

Vol. 35, No. 1, January 2000
Processing and Characterization of a Model Functionally Gradient Material—V. Parasmeswaran and A. Shukla, pp. 21–29

Vol. 35, No. 2, January 2000
The Manufacture and Mechanical Testing of Thermoetting Natural Fibre Composites—D. G. Hepworth, D. M. Bruce, J. F. V. Vincent, et al., pp. 293–298
Characterization of Coated Particulate Fillers—M. Gilbert, I. Sutherland, and A. Guest, pp. 391–397

Vol. 35, No. 3, February 2000

- Review—Properties of Blends and Composites Based on Poly(3-hydroxybutyrate (PHB) and Poly(3-hydroxybutyrate-hydroxyvalerate) (PHBV) Copolymers—M. Avella, E. Martuscelli, and M. Raimo, pp. 523–545
- Compression of a 0 Degrees-Ply/Acrylic Sandwich—P. J. Berbinau and E. G. Wolff, pp. 643–648

Vol. 35, No. 4, February 2000

- Tensile Creep Behavior of 3-D Woven Si-Ti-C-O Fiber/SiC-Based Matrix Composite with Glass Sealant—T. Ogasawara, T. Ishikawa, and N. Suzuki, et al., pp. 785–793
- Poly(3-hydroxybutyrate-co-3-hydroxyvalerate) and Wheat Straw Fibre Composites: Thermal, Mechanical Properties and Biodegradation Behaviour—M. Avella, G. L. Rota, E. Martuscelli, et al., pp. 829–836
- Dissolution Mechanisms of Boro-Silicate Glass Fibres in Saline Solution with Added Dissolved Silica—P. Bailtif, B. Chouikhi, and J. C. Touray, pp. 967–973
- Fracture Behavior of Calcium Aluminate-Phenol Resin Composite—G. K. D. Pushpalal, pp. 981–987
- Surface Strengthening and Toughening of Si3N4/TiC Layered Composite by Slip Casting—C. H. Yeh and M. H. Hon, pp. 1037–1041

Vol. 35, No. 5, March 2000

Vol. 35, No. 6, 2000

Equal-Channel Angular Pressing of an Al-6061 Metal Matrix Composite—Y. Li and T. G. Langdon, pp. 1201–1204

Vol. 35, No. 7, 2000

Surface Characterizations of Conductive Poly(Methyl Methacrylate)/Polypyrrole Composites—M. Omnast and F. Simon, pp. 1743–1749
Submicron Diameter Nickel Filaments and Their Polymer-Matrix Composites—X. P. Shui and D. L. L. Chung, pp. 1773–1785

Vol. 35, No. 8, April 2000

Effect of Acidic Anode Treatment on Carbon Fibers for Increasing Fiber-Matrix Adhesion and Its Relationship to Interlaminar Shear Strength of Composites—S. J. Park and M. H. Kim, pp. 1901–1905
The Effect of Thermoplastic Coating on the Mechanical Properties of Woven Fabric Carbon/Epoxy Composites—S. G. Shin and J. S. Jang, pp. 2047–2054

Vol. 35, No. 9, May 2000

Mechanical Properties of HDPE/Magnesium Hydroxide Composites—S. Ulutan and M. Gilbert, pp. 2115–2120

The Effect of Surface Treatment on the Performance Improvement of Carbon Fiber/Polybenzoxazine Composites—J. S. Jang and H. J. Yang, pp. 2297–2303

Vol. 35, No. 10, May 2000

Host-Guest Composites Containing Ultrasonically Arranged Particles—M. Saito and Y. Imanishi, pp. 2373–2377

Improved Thermomechanical Stability of Polymer-Derived Silicon Carbide Fibers by Decaborane Incorporation—G. J. Choi, W. Toreki, and C. D. Batch, pp. 2421–2427

The Interface Reaction and Microstructure in a ZK60-Based Hybrid Composite—M. Y. Gu, Z. A. Wu, Y. P. Jin, et al., pp. 2499–2505

Mechanism of Localized Corrosion of Aluminum-Silicon Carbide Composites in a Chloride Containing Environment—Z. Ahmad, P. T. Paulette, and B. J. A. Aliem, pp. 2573–2579

Vol. 35, No. 11, June 2000

Journal of Reinforced Plastics and Composites

Vol. 18, No. 16, 1999

Verification of a Simulation Model for Resin Film Infusion of Complex Shaped Composite Structures—A. C. Caba, D. Rat-tazzi, R. Batra, and A. C. Los, pp. 1465–1478

Effect of Local Material Variations on Tapered Sandwich Structures—M. J. King, J. Chen, J. A. Sherwood, and V. Brachos, pp. 1479–1495

Vol. 18, No. 17, 1999

A Discussion of Negative Poisson’s Ratio Design for Composites—R. Zhang, H.-L. Yeh, and H.-Y. Yeh, pp. 1546–1556

Delamination Modeling and Detection in Smart Composite Plates—A. Chattopadhyay, C. Nam, and D. Dragomir-Daescu, pp. 1557–1572

Effects of Saline Water Immersion on Glass Fibre/Vinyl-Ester Wrapped Concrete Columns—S. Zhang, L. Ye, and Y.-W. Mai, pp. 1592–1604

Stress Field in Continuous Fiber-Reinforced Composites with Multiple Interfacial Layers—P. C. Upadhyay and J. S. Lyons, p. 1630–

Vol. 18, No. 18, 1999

A High-Damping Magnesium Matrix to Limit Fatigue in Composite—C. Mayencourt and R. Schaller, pp. 1677–1688

Failure Mechanisms in Compression-Loaded Composite Lami-nates Containing Open and Filled Holes—A. J. Sawicki and P. J. Minguet, pp. 1708–1728

Impact Transverse Shear Properties in CFRP Laminates—O-Il Byon (G. Ben) and M. Hashimoto, p. 1729–

Vol. 19, No. 1, 2000

Dynamic Fracture of Composite Overwrap Cylinders—J. T. Tzeng, pp. 2–14

An Interface Model for the Mechanical Interaction between FRP Bars and Concrete—J. Guo and J. V. Cox, pp. 15–33

Interlaminar Stresses in Composite Notched and Unnotched Lami-nates—T. Nyman and M. Friberg, pp. 34–57

Application of Moire Interferometry to the Analysis of Residual Stresses in Metal-Matrix Composites—B. S.-J. Kang, D. W. Lyons, and P. C. Upadhyay, pp. 69–82

Vol. 19, No. 2, 2000

Effect of Loading Path on Mechanical Response of a Glass Fabric Composite at Low Cyclic Fatigue under Tension/Torsion Biaxial Loading—A. Inoue, T. Fuji, and H. Kawakami, pp. 111–123

On the Effective Elastic Properties of Composites with Evolving Microcracking—A. A. Caiazzo and F. Costanzo, pp. 152–163

Vol. 19, No. 3, 2000
Analysis of the Consolidation in Flexible Bladder Process for Thin Composite Parts by Finite Element Method—X.-T. Pham and F. Trochu, pp. 182–218

Experimental and Theoretical Study of the Thermoforability of Industrial Polymers—D. Larocque and F. Erchiqui, pp. 230–239

Experimental Investigation of Beam-Column Behavior of Pultruded Structural Shapes—E. J. Barbero and M. Turk, p. 249–

Vol. 19, No. 4, 2000

A Simple Closed-Form Solution of Bending Stiffness for Laminated Composite Tubes—W. S. Chan and K. C. Demirhan, pp. 278–291

Vol. 19, No. 5, 2000
A Nonlocal Damage Theory for Laminated Plate with Application to Aircraft Damage Tolerance—M. Nahan and T. Kennedy, pp. 354–363

Ultimate Strength Failure Probability Estimation of Composite Structures—X. Liu and S. Mahadevan, p. 403–

Vol. 18, No. 15, 1999

Wood Polymer Composites Using Thermal and Radiation Techniques—N. I. El-Awady, pp. 1367–1374

Influence of the Mode Mix of Precracking on the Delamination Toughness of Laminated Composites—B. D. Davidson and K. L. Koudela, pp. 1408–1414

Mode II Interlaminar Fracture Behavior of Fiber Reinforced Polyamide Composites under Static and Dynamic Loading Conditions—M. Todo, T. Nakamura, and K. Takahashi, pp. 1415–1427

Finite Element Analysis of Transverse Cracking Behaviour in Hybrid Angle-Ply Composite Laminates—B. Pradhan, N. V. Kumar, and N. S. Rao, p. 1428–

Vol. 19, No. 6, 2000
Equivalent Damage and Residual Strength for Impact Damaged Composite Structures—T. Nyman, A. Bredberg, and J. Schön, pp. 428–448

Effect of Hygrothermal Environment on the Bending of PMC Laminates under Large Deflection—P. C. Upadhyay and J. S. Lyons, pp. 465–491

Vol. 19, No. 7, 2000
Combinatorial Optimization for Angles of Wrap in Filament Wound Cylinders—S. V. Amiouny and S. V. Hoa, pp. 522–534

Journal of Testing and Evaluation
Vol. 27, No. 6, November 1999
Effects of Silica Fume and Steel Fibers on Some Mechanical Properties of High-Strength Fiber-Reinforced Concrete—Ö. Eren, K. Marar, and T. Çetlik, pp. 380–387

Vol. 28, No. 1, January 2000
Experimental and Numerical Study of Delamination Growth Induced by a Transverse Crack in Unidirectional Laminates Subjected to Bending Loads—F. Javidrad, pp. 12–21

Mechanics of Composite Materials
Vol. 35, No. 4, July–August 1999
A Physically Based Failure Criterion for Laminated Composites—L. Kroll and W. Hufenbach, pp. 277–284

Comparative Analysis of Two Algorithms for Numerical Solution of Nonlinear Static Problems for Multilayered Anisotropic Shells of Revolution. 2. Account of Transverse Compression—G. M. Kulikov and S. V. Plotnikova, pp. 293–300
On the Stress Distribution in a Rectangular Thick Plate of a Composite Material with Curved Surface under Forced Vibration—A. D. Zamanov, pp. 301–306
Solution of the Stochastic Boundary-Value Problem of Elasticity Theory for Composites with Disordered Structures in the Correlative Approximation of the Method of Quasi-Periodic Components—A. A. Pan’kov, pp. 315–324
Analysis of Elasticomeric Composites Based on Fiber-Reinforced Systems. 3. Two-Directional Composites—V. M. Akhundov, pp. 325–334
Experimental Studies on the Adhesion Strength of a Polymer-Metal Bond Depending on the Contact Zone Geometry—V. N. Kovrov and V. G. Zolotukhin, pp. 335–338

Vol. 35, No. 5, September–October 1999
Deformation of Dispersely Failing Unidirectional Composites—A. Lagzdins, G. Teters, and A. Zilaus, pp. 373–382
Dynamic Properties of Composite Laminates and Panels with Highly Contrasting Directions of Anisotropy—D. D. Zakharov, pp. 403–408
Boundary-Value Problem in the Correlative Approximation of the Method of Quasi-Periodic Components for a Unidirectional Fiber Composite—A. A. Pan’kov, pp. 419–428
Interdiffusion and Adhesion at the Interface of a Polystyrene-poly(2,6-dimethyl-1,4-phenylene Oxide) Blend Below the Glass Transition Temperature—Y. M. Boiko and R. E. Prud’homme, pp. 441–446

Polymer Composites
Vol. 20, No. 6, December 1999
Effects of Interlaminar Stresses on Damping of 0-Degree Unidirectional Laminated Composites—J. H. Yim, B. Z. Jung, J. C. Suhling, and J. W. Gillespie, Jr., pp. 796–803
Fluid Flow Reconstruction Modeling with Application to Liquid Molding Processes—S. M. Walsh and C. E. Freese, p. 809–

Vol. 21, No. 1, February 2000
Effect of Volume Loading and Surface Treatment on the Thixotropic Behavior of Polypropylene Filled with Calcium Carbonate—Y. Wang and M.-J. Yu, pp. 1–12
On Predicting Elastic Moduli and Natural Frequencies of Multi-Phase Composites with Randomly Distributed Short Fibers—L.-P. Chao and Y.-S. Huang, pp. 20–27
Injection Molding of Short Fiber Reinforced Thermoplastics in a Center-Gated Mold—Å. Larsen, pp. 51–64

Pulling Tension Monitoring During the Melt Impregnation of Glass Roving—P. J. Bates and J. M. Carriher, pp. 104–113

Volume 21, No. 2, April 2000

Performance Evaluation of Synthesized Acrylic Acid Grafted Polypropylene within CaCO3/Polypropylene Composites—F. Rahma and S. Fellabi, pp. 175–186

Relationship Between Scale Effect and Structure Levels in Fibrous Structures—N. Pan, S. Zhao, and T. Hua, pp. 187–195

Effect of Stacking Sequence on the Compressive Performance of Impacted Aramid Fiber/Glass Fiber Hybrid Composite—R. Park and J. Jang, pp. 231–237

Rate-Dependent Function in the Correlation Between Hardness and Yield Stress of Polyethylene Composites—J. Suwanprateeb, pp. 238–244

Modeling Compression Molding of All-Thermoplastic Honeycomb Core Sandwich Components. Part A: Model Development—M. Åkermo and B. T. Åström, pp. 245–256

Modeling Compression Molding of All-Thermoplastic Honeycomb Core Sandwich Components. Part B: Model Verification—M. Åkermo and B. T. Åström, pp. 257–267

Polymer Bonded Magnets. II. Effect of Liquid Crystal Polymer and Surface Modification on Magneto-Mechanical Properties—J. Xiao and J. U. Otaigbe, pp. 332–342

Polymers & Polymer Composites

Volume 7, No. 3, 1999

Interlaminar Fracture Toughness of Glass Fiber-Reinforced Polypropylene Laminates—W. Ding and M. T. Kortschot, pp. 249–256

Volume 7, No. 5, 1999

Welding of High-Performance Thermoplastic Composites—R. Rudolf, P. Mitschang, M. Neitzel, and C. Rueckert, pp. 309–316

Measurements to Characterise the Uniaxial Orientation in Nylon 6-6 Fibres Caused by Thermal Treatment—J. M. Fouda and F. M. El-Sharkawy, p. 355–

Volume 7, No. 6, 1999

Fibre Reinforced Plastics in Automotive Pedal Boxes—S. M. Sufficient, pp. 421–430

Volume 7, No. 7, 1999

Photograft Polymerization of Vinyl Monomers Initiated by Azo Groups Introduced onto Glass Fibre Surfaces—K. Fujiki and M. Sakamoto, pp. 453–460

Vol. 8, No. 1, 2000

Effect of Thermal and Mechanical Processes on the Molecular Orientation of Polyester Fibres—I. M. Fouda and H. M. Shabana, p. 51–

Vol. 8, No. 2, 2000

Electrically Conductive Elastomer Composites Containing Polyaniline—T. Tsanov, M. Ditcheva-Kortchakova, and L. Terlemezyan, pp. 115–122

Effect of Surface Treatment of Glass Fibres on Adhesion to Polypropylene Resin—S. Chou, L.-S. Lin, and J.-T. Yeh, p. 131–

Vol. 8, No. 3, 2000

Sample Journal

November/December 1999

Bismaleimide Composites Come of Age: BMI Science and Applications—J. Boyd, p. 13–

Thermomechanical Behavior of Epoxy-Aluminum Composites Used for Soft Tooling—R. Connolly, H. Vaillancourt, and J. Subirana, p. 34–

January/February 2000

High-Temperature Organic Composite Applications for Supersonic Missile Airframes—A. Facciano, pp. 9–24

Development of Composites, Adhesives and Seals for High-Speed Commercial Airplanes—P. M. Hergenrother, p. 30–

March/April 2000

Automated Tape Placement with In-situ Electron Beam Cure—D. L. Goodman, C. A. Byrne, A. Yen, R. Moulton, D. Dixon, and R. C. Costen, pp. 11–24

Filament Wound Preforms for RTM—D. DeWayne Howell and F. E. Roundy, p. 41–

May/June 2000

Design for Manufacturing and Assembly: A Case Study in Cost Reduction for Composite Wing Tip Structures—F. M. Swanstrom and T. Hawke, pp. 9–18

Novel Ultra-High Performance Concrete as Mold Material for the Blow Molding Process—A. Attar, A. Bendada, R. Connolly, Y. Dénommé, É. Dallaire and P. C. Aitcin, pp. 45–54
Calendar on Composites

The following meetings may be of interest to researchers in the field of composite materials.

31 October-2 November 2000  
Third International Conference on Composite Materials for Offshore Operations, Houston, TX, Contact: Dr. S.S. Wang, University of Houston—CEAC, Houston, TX 77203-0903, tel: 713-743-5953, fax: 713-743-5063, email: sswang@uh.edu.

5–9 November 2000  

5–10 November 2000  
Symposium on Design and Manufacturing of Composites, International Mechanical Engineering Congress and Exhibition, Orlando, FL, Contact: Professor Serge Abrate, Department of Technology, Southern Illinois University, Carbondale, IL 62901-6603, tel: 618-453-7826, fax: 618-453-7455, email: abrate@engr.siu.edu.

29 November-1 December 2000  

3–8 December 2000  
COMADEM 2000, Houston, TX, Contact: Sallie C. Pusey, MFPT Society Headquarters, tel: 703-754-2234, fax: 703-754-9743, email: hcpusey@ix.netcom.com.

4–6 December 2000  

26–27 March 2001  

3–5 April 2001  
General Aviation Technology Conference and Exposition, Wichita, KA, Contact: Scott Klavon, SAE Staff Engineer, SAE World Headquarters, 400 Commonwealth Dr., Warrendale, PA 15096-0001, tel: 724-776-4970, fax: 724-776-0690, scott@saegl.org.

16–19 April 2001  
AIAA/ASME/AHS Adaptive Structures, Sheraton Seattle Hotel & Towers, Seattle, WA, Contacts: Dr. Friedrich K. Straub, MS530-B346, Boeing, 5000 E. McDowell Road, Mesa, AZ 85215, tel: (480)891-6058, fax: (480)891-7671, email: friedrich.k.straub@boeing.com, Dr. Diann Brei, Mechanical Engineering and Applied Mechanics Dept., University of Michigan, 2250 G. G. Brown, Ann Arbor, MI 48109-2125, tel: (734)763-6617, fax: (734)647-3170, email: dibrei@engin.umich.edu.

16–19 April 2001  
42nd AIAA/ASME/ASCE/AHS Structures, Structural Dynamics, and Materials Conference, Sheraton Seattle Hotel & Towers, Seattle, WA, Contact: Dr. Shankar Mall, Materials and Manufacturing Directorate, AFIT/ENY, Bldg. 640, 2950 P Street, WPAFB, OH 45433-7765, tel: (937)255-3636 x4587, fax: (937)656-7621, email: Shankar.Mall@afit.af.mil.

8–11 June 2001  
The Fourth International Congress on Thermal Stresses, Osaka, Japan, Contact: Professor Y. Tanigawa, General Chair, Thermal Stresses 2001, Department of Mechanical Systems Engineering, Osaka Prefecture University, Gakuenscho 1-1, Sakai, Osaka 599-8531, Japan, web: http://www.ts2001.gr.jp

Send items for this calendar to:  
Ronald B. Bucinell, Ph.D., P.E.

# Table of Contents

**Volume 22, 2000**

## No. 1, January

- **High Strain Rate Characterization of a Glass/Epoxy Composite**—O. I. OKOLI AND G. F. SMITH  
- **Stress Transfer in the Fiber/Matrix Interface of Titanium Matrix Composites Due to Thermal Mismatch and Reaction Layer Development**—F. W. M. PETERS, J. HEMPTENMACHER, AND A. WERNER  
- **Failure Initiation in Translaminar Reinforced Composites**—L. C. DICKINSON, G. L. FARLEY, AND M. K. HINDERS  

## TECHNICAL NOTES

- **Effect of High-Frequency Low-Amplitude Impact Loads on Polymeric Composites**—R. THOMAS AND R. KRISHNAMURTHY  
- **Some Results from X-ray Computed Tomography Applied to Metal Matrix Composites**—M. GONZALEZ, G. DOMINGUEZ, AND C. BATHIAS  
- **Calendar on Composites**

## No. 2, April

- **Evaluation of the Effect of a Custom Fiber Surface Treatment on the Adhesion Level in a Polymer-Based Composite Using the Single Fiber Fragmentation Test**—D. BRADFORD, K. LEASE, AND P. M. A. SHERWOOD  
- **A Two Dimensional Rule-of-Mixtures Micromechanics Model for Woven Fabric Composites**—X.-L. GAO AND S. MALL  
- **Lightning Strike of Perforated Carbon Fiber Epoxy Laminar Flow Panels**—D. O’DRISCOLL, J. HARDWICK, T. YOUNG, AND J. RYAN  
- **Assessment of Residual Composite Properties as Influenced by Thermal Mechanical Aging**—J. D. WOOD, R. B. PLUNKETT, P. H. TSANG, K. N. E. VERGHESE, AND J. J. LESKO  
- **Numerically Based Compliance Calibration for Steel Frame Assisted Tension Specimen**—S. YOTTE AND J. M. QUENISSET  
- **Composites Contents**  
- **Calendar on Composites**

## No. 3, July

- **Cylindrical Indentation of Orthotropic Laminates on Elastic Foundations**—CHUN-FU  
- **A New Compression Test Fixture for Unnotched or Notched Thin Composite Laminates**—J. D. BARDIS, K. T. KEDWARD, J. O. BISH, AND T. K. TSOTSIS  
- **Mechanism-Based Modeling of Long-Term Degradation**—H. L. MCMANUS, B. J. FOCH AND R. A. CUNNINGHAM  
- **Scaling of First-Ply Failure and Strength in [+0/−0/−90₀/90₀]s Laminates: Experiments and Predictions**—J. ANDRE LAVOIE AND JOHN MORTON  
- **Evaluation of Four Composite Shear Test Methods by Digital Speckle Strain Mapping and Fractographic Analysis**—L. G. MELIN, J. M. NEUMEISTER, K. B. PETTERSSON, H. JOHANSSON, AND L. E. ASP

© 2000 by the American Society for Testing and Materials
No. 4, October

Preamble to the Collection of Papers Based on Presentations Given at the Symposium on Durability of Composites—CHARLES E. BAKIS, GUEST EDITOR

The Durability of Fiber Composites—The Case for Mechanism-Based Models—S. MARK SPEARING

Residual Strength-Based Life Predictions of Composite Materials Under Combined Damage Mechanisms—HOWARD G. HALVERSON AND SCOTT W. CASE

A Simple Discrete-Tow Model for Analysis of Textile Composites—C. R. CARRIER AND R. C. AVERILL

Fatigue Behavior of Glass-Reinforced Epoxy Resin Submitted to Hot-Wet Aging—GIORGIO ZAFFARONI AND CLAUDIO CAFFELLETI

Tensile Behavior of Filament-Wound Composites in Medium Vacuum—CYNTHIA L. SHIREY AND CHARLES E. BAKIS

Fiber-Reinforced Composite and Wood Bonded Interfaces: Part 1. Durability and Shear Strength—JULIO F. DAVALOS, PIZHONG QIAO, AND BRENT S. TRIMBLE

Fiber-Reinforced Composite and Wood Bonded Interfaces: Part 2. Fracture—JULIO F. DAVALOS, PIZHONG QIAO, AND BRENT S. TRIMBLE

A Life Prediction Methodology for Thick Section Composites Used in Civil Infrastructure—JOLYN SENNE, JOHN J. LESKO, AND SCOTT W. CASE

Composites Contents

Calendar on Composites

Index to Volume 22
**Submission**

The name, mailing address, position, affiliation, and telephone and fax number of each author must be supplied in a cover letter. The submitting author is to provide the names, affiliations, addresses, and telephone numbers of five to six individuals who are qualified to review impartially the paper and the research leading to it, and who are not employed at the same institution or company as any of the authors. While these names may or may not be used for the review, we will add them to our pool of potential reviewers. Also, a statement is to be included that the paper has not been published and is not under consideration for publication elsewhere. All permissions for previously published material used in the paper must be submitted in writing at this time.

The submitting author must also affirm that all those listed as co-authors have agreed (a) to be listed and (b) to submit the manuscript to ASTM for publication.

Five copies of the manuscript with clear copies of each figure are required. Original art work and computer disks should accompany the final revision.

**Manuscript Instructions***

**Word Processing Instructions**

The hard-copy text can be produced on any letter-quality printer. Text is to be printed double-spaced with left and right margins of 1 in. (25.4 mm) using left justification. New paragraphs are to be indented five spaces, and end-of-line returns are not to be used.

The revised manuscript is to be sent on a 5½ in. (133 mm) or 3½ in. (89 mm) disk preferably in WordPerfect 5.1, with the corresponding hard copies. ASTM can convert from other word-processing packages as well.

For complete manuscript instructions, which include a sample manuscript, call Shannon Wainwright, Administrative Assistant, ASTM Journals, 610/832-9618 or FAX 610/832-9623.

---

**Abstract and Keywords**

An abstract of 100–150 words and a list of 5–10 keywords that can be used to index the manuscript are required.

**Trademarks**

Commercialism is to be avoided by using generic terms whenever possible. Trademarks and trade names are to be capitalized if their use is unavoidable.

**SI Units**

Society policy requires the use of SI units in all publications (including figures and tables). If in.-lb units must be used to describe materials and present test results, SI equivalents must follow in parentheses. (See ASTM Standard for Metric Practice E380 for further information on SI units.)

**Figures**

Each figure is to be simple and uncluttered. All illustrations are to be placed together at the end of the manuscript with a separate sheet of figure captions. Consecutive Arabic (not Roman) numerals are required. The size of type in illustrations must be large enough to be legible after reduction. All lettering, lines, symbols, and other marks must be drawn in black India ink on white paper. Computer graphics must be produced by a laser printer. Photographs must be high-contrast black and white. SCALE MARKERS MUST BE SHOWN ON ALL PHOTOMICROGRAPHS AND ALL FIGURES THAT ARE REPRESENTATIONS OF EQUIPMENT OR SPECIMENS.

**Tables**

All tables are to be placed together at the end of the manuscript preceding the illustrations. Tables are to be numbered in Arabic and are cited in numerical order in the text. It is better to use several small simple tables than one large, complex table.

**References**

References shall be cited in the text in numeric order. Type the numerical citation on the line, not as a superscript, and enclose in brackets. References should be listed together at the end of the paper in numeric order. They must contain enough information to allow a reader to consult the cited material with reasonable effort.

**Copyright**

ASTM Requires that the submitting author shall return our "Author Agreement" with the revised paper assigning copyright to ASTM. For U.S. government employees whose manuscript has been prepared as part of their official duties, it is understood that copyright in the United States is not transferrable.
Manuscript Review

Each new manuscript is sent to the Technical Editor for consideration. If the Technical Editor finds that the manuscript fits the scope of the Journal, will be of interest to the readership, and is well written, the paper is processed for peer review.

Two or more reviewers, selected by a member of the Editorial Board, review each paper for technical content, originality, logical conclusions, sound data, reproducibility of results, and clarity of presentation; two or more reviewers provide reviews of each technical note. Their comments are compiled and evaluated. The reviewers’ anonymous comments and any other comments from the Technical Editor or his designee are then returned to the author for revision.

The author must submit five copies of the revised manuscript with an annotated (highlighted) version of the paper indicating clearly where each revision has been made and identifying the reviewer’s comment to which the revision is responding. Changes in the text including all MANDATORY reviewers’ comments must be addressed explicitly on the “Authors’ Response Form” provided during revision, as well as any explanation why a change was not made.

The Technical Editor will evaluate all revised manuscripts and make the final decision regarding publication in the Journal. The Editor may (1) accept the revised manuscript for publication, (2) require further revision or explanation, or (3) reject the revised manuscript. A revised manuscript may be sent for re-evaluation to a reviewer who has found major flaws in the original manuscript.

Editorial Review by ASTM

Each accepted paper is edited by the ASTM staff for style, organization, and proper English usage. The edited manuscript is returned to the author before typesetting. The typeset page proof is also sent to the author and the Technical Editor for final review prior to printing.

If ASTM does not hear from the author by the time designated for return of the edited paper and/or page proof, ASTM will proceed with the publication process.

Book Reviews

ASTM receives books from other publishers requesting book reviews. The books are available to potential reviewers in exchange for publishable reviews. Book reviews are screened and edited by the Technical Editor and staff without peer review. Anyone interested in acting as a reviewer should contact Shannon Wainwright at ASTM. Phone: (610) 832-9618.

Testing Forum and Tips

Anyone having interesting test tips should submit a brief description of such innovations to the Testing Forum. Such contributions are screened and edited by the Technical Editor and staff without peer review.
