#### Composites review
- Aging results for PRD 49 III/epoxy and Kevlar 49/epoxy composite pressure vessels (Hamstad), Winter, 120
- Deformation and failure processes of Kevlar 49 single filaments (Hudson, Pruneda, Kershaw, and Morgan), Winter, 115
- Effects of lay-up, temperature, and loading rate in double cantilever beam tests of interlaminar crack growth (Hunston and Bascom), Winter, 118
- Epoxy resin system for composite flywheels (Chiu, Kolb, and Newey), Spring, 18
- Generic aspects of three-dimensional internal damage development in fatigue-loaded composite laminates (Reifsnider), Summer, 71
- Life estimation of an S-Glass®/epoxy composite under sustained tensile loading (Glaser, Moore, and Chiao), Spring, 21
- Mixed-mode fracture criterion for composite materials (Hahn), Spring, 26
- No-stress aging of aramid/epoxy composites (Chiao, Moore, and Hahn), Fall, 98
- Shear characteristics of glass fiber/epoxy laminates (Xing-Hua, Zhen-Min, and Shuo), Fall, 89
- Silicon carbide yarn stimulates development of new composites (Prewo), Summer, 69
- Stress-optical microscopy studies of the microscopic deformation and failure modes of Kevlar 49/epoxy composites (Kong, Pruneda, and Morgan), Fall, 95

#### Conference reports
- Environmental effect of fibre-reinforced plastic (Hyer), Winter, 128
- Fifth metal matrix composites technology conference (Christensen), Winter, 127
- 14th national SAMPE technical conference (Cohen and Maxted), Spring, 43
- Mechanics of composites review (Reifsnider), Spring, 35
- Second United States-Japan conference on composite materials (Reifsnider), Winter, 127
- Sixth Annual Meeting of the Adhesion Society (Penn), Fall, 104
- Symposium on mechanics of composite materials (Reifsnider), Spring, 37

#### Crack propagation
- Effects of lay-up, temperature, and loading rate in double cantilever beam tests of interlaminar crack growth (Hunston and Bascom), Winter, 118
- Geodetic structures for future space systems, Summer, 53

#### Degradation
- No-stress aging of aramid/epoxy composites (Chiao, Moore, and Hahn), Fall, 98

#### Displacement
- On the off-axis tension test for unidirectional composites (Nemeth, Herakovich, and Post), Summer, 61

#### Epoxy composites
- Life estimation of an S-Glass®/epoxy composite under sustained tensile loading (Glaser, Moore, and Chiao), Spring, 21

#### Epoxy compounds
- Aging results for PRD 49 III/epoxy and Kevlar 49/epoxy composite pressure vessels (Hamstad), Winter, 120

#### Epoxy laminates
- Shear characteristics of glass fiber/epoxy laminates (Xing-Hua, Zhen-Min, and Shuo), Fall, 89

#### Fiber reinforced composites
- Drop weight impact testing of laminates reinforced with Kevlar® aramid fibers, E-glass, and graphite (Wardle and Tokarsky), Spring, 4

#### Fibers
- The deformation and failure processes of Kevlar 49 single filaments (Hudson, Pruneda, Kershaw, and Morgan), Winter, 115
- Drop weight impact testing of laminates reinforced with Kevlar® aramid fibers, E-glass, and graphite (Wardle and Tokarsky), Spring, 4

#### Flywheels
- An epoxy resin system for composite flywheels (Chiu, Kolb, and Newey), Spring, 18

#### G-H
- Review of Composite Materials: Mechanics, Mechanical Properties and Fabrication by Kawata and Akasaka, Spring, 30

#### Degradation
- No-stress aging of aramid/epoxy composites (Chiao, Moore, and Hahn), Fall, 98
