390 Study of the Backfill Confined Consolidation Law and Creep Constitutive Model under High Stress
Zhikai Wang, Peng Yang, Wensheng Lyu, Genbo Yu, and Chao Yang

403 Validation of a Thermo-Time Domain Reflectometry Probe for Sand Thermal Conductivity Measurement in Drainage and Drying Processes
Nan Zhang, Xinbao Yu, and Xuelin Wang

REVIEW PAPER

413 Monitoring Shear Strain in Shallow Subsurface Using Mini Pipe Strain Meter for Detecting Potential Threat of Slope Failure
Satoshi Tamate and Tomohito Hori

TECHNICAL NOTE

425 Constant Rate of Strain Consolidation Testing of Saturated Cohesive Soils Without Back Pressure Saturation
Melissa E. Landon, Christopher Marchetti, and Don J. DeGroot

The Geotechnical Testing Journal is online.

Published bimonthly by ASTM International | 100 Barr Harbor Drive | PO Box C700 | W. Conshohocken, PA 19428-2959

Volume 41, Number 2
March 2018
Codent: GTJODJ

Contents:

223 A Simplified Direct Shear Testing Procedure to Evaluate Unsaturated Shear Strength
Chen-Ting Tang, Roy H. Borden, and Mohammed A. Gabr

235 Analysis of Energy Properties and Failure Modes of Heat-Treated Granite in Dynamic Splitting Test

247 Design, Use, and Interpretation of an Instrumented Flat Dilatometer Test
Hao Shen, Wim Haegeman, and Herman Peiffer

263 Development of a Large-Size Cyclic Direct Simple Shear Device for Characterization of Ground Materials with Oversized Particles
Dimitrios Zeikos, Alda Alhanasopoulou-Zeikos, Jonathan Hubler, Xunchang Fei, Kaveh H. Zehtab, and W. Allen Marr

280 Effects of Light Cement Stabilization on Properties of Fine-Grained Dredged Soils
Mohammed O. A. Bazne, Farshid Vahedifard, and Isaac L. Howard

Swagata Bissi and Sumanta Haldar

329 Internal Morphology of Cracking of Two 3-D Pre-Existing Cross-Embedded Flaws under Uniaxial Compression
Xiao-Ping Zhou, Jian-ZN Zhang, Lu-Hao Yang, and Yu Long Cai

340 Large-Scale Combination Direct Shear/Simple Shear Device for Tire-Derived Aggregate
Patrick J. Fox, Stuart S. Thielmann, Michael J. Sanders, Christopher Latham, Ismaila Ghaawed, and John S. McCartney

(Summary continued on back cover)
The purpose of the Geotechnical Testing Journal (1) to provide a high-quality publication that informs the profession of new developments in soil and rock testing and related fields; (2) to provide a forum for exchange of information, particularly that which leads to the development of new test procedures; and (3) to stimulate active participation in the profession of the work of ASTM International standards and recommendations for new test procedures. Contributions include papers, technical notes, letters to the editors, discussions of previously published papers, and book reviews. The editorial scope of this journal covers test methods for soil and rock, sampling, testing, data and test results related to the determination of properties and behavior of soil and rock for engineering purposes, and for soil as a medium for plant growth. Topics of special interest to our readers. The views expressed in this journal are not those of ASTM International. The data and opinions appearing in the published material were prepared by and are the responsibility of the contributors, not of ASTM International.
EDITORIAL OBJECTIVES
The Geotechnical Testing Journal is published in six issues per year by ASTM International, a nonprofit technical organization that develops and publishes voluntary consensus standards and related information for materials, products, systems, and services. Some issues, in whole or in part, may be Special Issues focused on a topic of interest to our readers. Contributions are peer reviewed prior to publication.

PURPOSE AND SCOPE
The purpose of the Geotechnical Testing Journal is (1) to provide a high-quality publication that informs the profession of new developments in soil and rock testing and related fields; (2) to provide a forum for the exchange of information, particularly developments in soil and rock testing and related fields; (3) to stimulate active participation of the profession in the work of ASTM International standards and recommendations for new and existing testing practices; and (4) to provide a forum to discuss the general nature of soil and rock and related committees.

Contributions include papers, technical notes, letters to the editor, discussions of previously published papers, and book reviews. The editorial scope of this journal covers test methods for soil and rock, sampling, testing, nomenclature, and practices relating to the determination of properties and behavior of soil and rock for engineering purposes, and for soil as a medium for plant growth. Topics of interest include new testing equipment, apparatus, and procedures for both field and laboratory applications; evaluation of existing ASTM International standards and recommendations for new standards for apparatus or test procedures; and test results that give insights into test procedures, techniques, and data interpretation. Topics must be related to soil and rock, but may include use and testing of geosynthetic materials in conjunction with soil and rock, highway materials testing such as aggregate properties or pavement performance measurement, geophysical exploration, marine sediments, groundwater investigations, testing and stabilization of contaminated soils and soil engineering related to waste management.

EXECUTIVE COMMITTEE
Dale P. Bohn, Chairman
Taco van der Matein, Vice Chairman
Andrew G. Kietzke, Jr., Vice Chairman
John R. Loger, Chairman of Finance and Administration
Ralph M. Paroli, Past Chairman
D. Thomas Marsh, Past Chairman
Katharine E. Morgan, President
