EDITORIAL OBJECTIVES

The Journal of Testing and Evaluation is published bimonthly by ASTM as part of the Testing and Evaluation Series, which includes the Geotechnical Testing Journal (published quarterly) and Cement, Concrete, and Aggregates (published semiannually). ASTM, a nonprofit organization, develops voluntary consensus standards for materials, products, systems, and services.

The objective of ASTM’s Journal of Testing and Evaluation is to provide a forum for presenting data derived from the testing and evaluation of materials, products, systems, and services of interest to the practicing engineer. Papers will be accepted on the grounds that they present new techniques or provide new information on existing methods of testing and evaluation, or that they contain new data resulting from testing and evaluation.

The importance of engineering standards to industry, national and international trade, and the protection of the public is now universally recognized. The technical validity of engineering standards—the international vocabulary of practical engineering communication—will be enhanced by continuing advances in methods of testing and evaluation.

Many of the articles appearing in the Journal of Testing and Evaluation are specifically presented to provide the basis for new or improved standard methods and to stimulate new ideas. If you have suggestions for possible areas of standardization, please contact Kenneth C. Pearson, ASTM, 1916 Race St., Philadelphia, PA 19103 (215/299-5520).

EDITORIAL STAFF

Bill Benzing, Editorial Manager
Kathleen A. Peters, Senior Assistant Editor
Susan Gebremedhin, Assistant Editor
Robert L. Meltzer, Vice-President of Publications and Marketing
M. Bruce Vieth, Manager of Production

ASTM OFFICERS

Lendell E. Steele, Chairman
Glady B. Berchtold, Vice-Chairman
Robert Baoian, Vice-Chairman
David M. Greason, Treasurer
William T. Cavanaugh, President
