Subject Index

Volume 25, 1997

A

Abrasive wear
Theory and application of a micro-scale abrasive wear test (Rutherford, KL and Hutchings, IM), March, 250

Acousto-ultrasonic method
Ultrasonic technique for monitoring automotive components (Lopes, R, Mazzerangi, A, Ronchiato, G, and Vangi, D), Sept., 516

Adhesive moment
Analysis of plowing and adhesive effects in the rolling ball tack method for pressure sensitive adhesives (Miyagi, Z, Yamada, N, Urahama, N, and Yamamoto, K), Jan., 23

Adhesives
Analysis of plowing and adhesive effects in the rolling ball tack method for pressure sensitive adhesives (Miyagi, Z, Yamada, N, Urahama, N, and Yamamoto, K), Jan., 23

Ageing
Effect of preloading on the strength of soda-lime glass (Chen, X and Matsumura, M), May, 354

Aging kinematics
Low-temperature aging kinetics in cast duplex stainless steels: experimental characterization (Gonzalez, JJ, Gutierrez-Solana, F, Sanchez, L, and Setien, J), March, 154

Air permeability
Relationship between porosity and air permeability of woven textile fabrics (Epps, HH and Leonas, KK), Jan., 108

Theory method to determine the relative humidity dependence of the air permeability of woven textile fabrics (Gibson, PW, Elsaiid, AE, Kendrick, CE, Rivin, D, and Carmchi, M), July, 416

Aluminum alloys
Hot plane strain compression testing of aluminum alloys (Shi, H, McLaren, AJ, Seljars, CM, Shahani, R, and Bolingbrooke, R), Jan., 61

Analysis of variance
Application of analysis of variance (ANOVA) statistical methods to breaking load corrosion test (Golinkin, IA, Ruff, DD, Kvam, EP, McCabe, GP, and Grandt, AF, Jr.), Nov., 565

Asphaltic mixtures
Relating triaxial test properties of asphalt mixtures to mix parameters determined by Marshall stability test (Fwa, TF, Tan, SA, and Low, BH), Sept., 471

Attribute data
Repeatability and reproducibility for pass/fail data (Mandel, J), March, 151

Automated testing
Hoechst Celanese improves consistency of cellulose acetate through automated viscosity measurement (Hawley, L), Sept., 525

B

Beams
Transverse vibration of a simply supported beam with symmetric overhang of arbitrary length (Murphy, JF), Sept., 522

BET surface area
Comparison of calculated geometric surface area and measured BET surface area for a metal powder (Schröder-Pedersen, A, Kjøller, J, and Larsen, B), July, 365

Bonded resistance strain gage
Local versus global strain measurement of a polymeric geogrid (Perkins, SW, Schulz, JL, and Lapeyre, JA), Nov., 576

Book reviews
Theory and Design for Mechanical Measurements by Figliola and Beasley (Petersen, DR), July, 461

Theory and Practice of Force Measurement by Bray et al. (Bailey, WH), Jan., 149

Breaking elongation
Effects of laundering and exposure to light on environmentally-improved fabrics (Leimer, S, Moore, MA, and Goldsmith, E), Sept., 497

Brickwork
Methodology for the fire resistance testing of structural components at reduced scale (O'Connor, DJ, Morris, B, and Silcock, GWH), May, 273

Bridges
First continuous remote bridge monitoring system ensures safe operation of 65-year-old rolling bascule bridge (Prine, D), March, 267

Calibration
Calibration of weigh-in-motion systems through dynamic vehicle simulation (Papagiannakis, AT), March, 197

Calculating instrument readings using a bivariate confidence interval (McDonald, BJ and Trautner, JJ), Jan., 36

Calorimetry
Low-cost, computer-controlled adiabatic calorimeter for determining the heat of hydration of concrete (Gibbon, GJ, Ballim, Y, and Grieve, GRH), March, 261

Cast duplex stainless steels
Low-temperature aging kinetics in cast duplex stainless steels: experimental characterization (González, JJ, Gutiérrez-Solana, F, Sánchez, L, and Setién, J), March, 154

Castings
Experimental determination of the cooling curve for production of continuous-cast steel billets (Bailey, WH, Jr.), Jan., 49

Cellulose
Hoechst Celanese improves consistency of cellulose acetate through automated viscosity measurement (Hawley, L), Sept., 525

Cellulose acetate
Hoechst Celanese improves consistency of cellulose acetate through automated viscosity measurement (Hawley, L), Sept., 525

Ceramics
Material specifications of advanced ceramics and other issues in the use of property databases with corrosion analysis models (Munro, RG), May, 349
Effects of laundering and exposure to light on environmentally-improved fabrics (Leimer, S, Moore, MA, and Goldsmith, E), Sept., 497

Chemical structural information
Computerized chemical structural information (CSI) and associated data: a study of computerized CSI pathways used by synthesis chemists, and recommendations for guidelines (Gragg, CE), May, 337

Chemical synthesis
Computerized chemical structural information (CSI) and associated data: a study of computerized CSI pathways used by synthesis chemists, and recommendations for guidelines (Gragg, CE), May, 337

Chevron-notched specimens
Measurement of the fracture energy of interfaces in composites through sandwich-type chevron-notched specimens (Shaw, LL), July, 391

Chronic obstructive lung disease
Experiments increase understanding of chronic obstructive lung disease (Kayser, B), Nov., 584

CMOS D-latch
Testing and design of CMOS D-latches (Aissi, C and Olaniyan, J), Jan., 52

Coatings
Theory and application of a micro-scale abrasive wear test (Rutherford, KL and Hutchings, IM), March, 250

Coefficient of friction
Comparison of walkway safety tribometers: Part Two (Marpet, MI and Fleischer, DH), Jan., 115
Kinematic methods for quantifying loss of balance while negotiating a curved path on a slippery surface (Wang, B, Bhattacharya, A, Bagchee, A, Wang, W, and Succop, PA), Jan., 135
Use of the Tortus and the Pendulum with the 4S rubber for the assessment of slip resistance in the laboratory and the field (Dravitzki, VK and Potter, SM), Jan., 127

Coefficient of thermal expansion
Instantaneous coefficient of linear thermal expansion—a new definition (Bhattachar, VS), Sept., 479

Cohesion
Relating triaxial test properties of asphalt mixtures to mix parameters determined by Marshall stability test (Fwa, TF, Tan, SA, and Low, BH), Sept., 471

Color measurement
Effects of laundering and exposure to light on environmentally-improved fabrics (Leimer, S, Moore, MA, and Goldsmith, E), Sept., 497

Compact-tension geometry
Elastic compliance of the compact tension specimen comprising two linear-elastic materials bonded with a thin layer (McNaney, JM, Havens, R, and Ritchie, RO), Jan., 28

Compliance
Elastic compliance of the compact tension specimen comprising two linear-elastic materials bonded with a thin layer (McNaney, JM, Havens, R, and Ritchie, RO), Jan., 28

Composites
Effect of specimen thickness on the long-life fatigue performance of a randomly-oriented continuous-strand glass-mat-reinforced polypropylene composite (Little, RE), Sept., 491
Experimental assessment of four composite material shear test methods (Adams, DF and Lewis, EQ), March, 174
Mixed mode fiber pull-out equipment: applications and results (Leung, CKY and Geng, YP), May, 283
Ultrasonic characterization of interphasial properties in sapphire/Haynes 214 composites (Huang, W, Chu, YC, Rokhlin, SL, and Wright, PK), Jan., 1

Compressor rotor
Ultrasonic stress evaluation in a compressor rotor (Bray, DE, Tang, W, and Grewal, DS), Sept., 503

Computer analysis
PC-based near real-time ultrasonic imaging system for flaw characterization (Anand, RS and Kumar, V), Nov., 529

Computerized systems
Computerized chemical structural information (CSI) and associated data: a study of computerized CSI pathways used by synthesis chemists, and recommendations for guidelines (Gragg, CE), May, 337
Experiments increase understanding of chronic obstructive lung disease (Kayser, B), Nov., 584
Expert infobox system for tracing hazardous materials in engineering documents and system requirements for materials information standardization (U, AS and Toomer, B), May, 341
Material specifications of advanced ceramics and other issues in the use of property databases with corrosion analysis models (Munro, RG), May, 349

Concrete
Low-cost, computer-controlled adiabatic calorimeter for determining the heat of hydration of concrete (Gibbon, JJ, Ballim, Y, and Grieve, GRH), March, 261
Methodology for the fire resistance testing of structural components at reduced scale (O'Connor, DJ, Morris, B, and Silcock, GWH), May, 273

Confidence interval
Calibrating instrument readings using a bivariate confidence interval (McDonald, BJ and Trautner, JJ), Jan., 36

Conformity assessment
Repeatability and reproducibility for pass/fail data (Mandel, J), March, 151

Consensus value
Consensus values and reference values illustrated through the Charpy machine certification program (Wang, JC-M and Splett, JD), May, 308

Contamination
Development and precision testing of a standard test method for screening fuels in soils (Sorini, SS and Schabron, JF), July, 400

Continuum damage mechanics
Strain-controlled cumulative fatigue with mean strains high-cycle and low-cycle interaction (Gong, Y and Norton, MP), July, 429

Cooling curve
Experimental determination of the cooling curve for production of continuous-cast steel billets (Bailey, WH, Jr.), Jan., 49

Corrosion
Material specifications of advanced ceramics and other issues in the use of property databases with corrosion analysis models (Munro, RG), May, 349

Corrosion (metals)
Application of analysis of variance (ANOVA) statistical methods to breaking load corrosion test (Golinkin, IA, Ruff, DD, Kvam, EP, McCabe, GP, and Grandt, AF, Jr.), Nov., 565

Crack growth rates
Tapered double-cantilever-beam specimen designed for constant-K testing at elevated temperatures (Berens, W, Koul, AK, and Thamburaj, R), Nov, 536

Crack length
Elastic compliance of the compact tension specimen comprising two linear-elastic materials bonded with a thin layer (McNaney, JM, Havens, R, and Ritchie, RO), Jan., 28

Crimp
Estimating creep rates during tensile cyclic loading (Arbel, A), May, 358

Crimp crack growth
Fatigue and creep crack growth in fine sand asphalt materials (Kleemans, CP, Zuidema, J, Krans, RL, Molenaar, JMM, and Tolman, F), July, 424

Crimp
Effects of surface geometry on fabric friction (Ajary, JO and Elder, HM), March, 182
Cryogenic temperatures
Eddy current decay resistivity measurements using a digital voltmeter (Hua, CY, McDonald, LC, and Hartwig, KT), Jan., 41

Cumulative fatigue damage
Strain-controlled cumulative fatigue with mean strain and high-cycle and low-cycle interaction (Gong, Y and Norton, MP), July, 429

Cutting tools
Needs and applications in precision measurement and monitoring of wear (Budinski, KG), March, 226

Cyclic loading
Estimating creep rates during tensile cyclic loading (Arbel, A), May, 358

Cylinders
Precision profilometry of wear scars on curved surfaces (Yust, CS and Blau, PJ), March, 246

D

Damage monitoring
Ultrasonic technique for monitoring automotive components (Lopes, R, Mazzeranghi, A, Ronchiato, G, and Vangi, D), Sept., 516

Damping

Data acquisition and analysis package
Experiments increase understanding of chronic obstructive lung disease (Kayser, B), Nov., 584

Deep hole drilling
Statistical design of experiments in metal cutting—Part Two: Applications (Astakhov, VP, Osman, MOM, and Al-Ata, M), May, 328

Detection technology
Evaluation of overhead and in-ground vehicle detector technologies for traffic flow measurement (Klein, LA, Kelley, MR, and Mills, MK), March, 205

Diffusion
Test method to determine the relative humidity dependence of the air permeability of woven textile fabrics (Gibson, PW, Elsaid, AE, Kendrick, CE, Rivin, D, and Charmchi, M), July, 416

Digital circuits
Testing and design of CMOS D-latches (Aissi, C and Olaniyan, J), Jan., 52

Double cantilever beam specimen
Tapered double-cantilever-beam specimen designed for constant-K testing at elevated temperatures (Beres, W, Koul, AK, and Thamburaj, R), Nov., 536

Drainage properties
New apparatus for measuring the drainage properties of porous asphalt mixes (Ann, TS, Fang, FT, and Tiong, CC), July, 370

Dynamic testing
Determination of tensile properties at increased strain rates and various temperatures (Schindler, HJ and Veidt, M), Nov., 571

E

Eddy current decay
Eddy current decay resistivity measurements using a digital voltmeter (Hua, CY, McDonald, LC, and Hartwig, KT), Jan., 41

Edge wear
Needs and applications in precision measurement and monitoring of wear (Budinski, KG), March, 226

Elastic-plastic fracture
Determination of J-R factor: influence of side grooving (Cassanelli, AN, de Vedia, LA, and Herrera, R), Nov., 543
Modified normalization method for developing J-R and CTOD-R curves with the LMN function (Forrest, CJFO and Bastian, FL), May, 302

Electrical conductors
Eddy current decay resistivity measurements using a digital voltmeter (Hua, CY, McDonald, LC, and Hartwig, KT), Jan., 41

Electronic testing and design of CMOS D-latches (Aissi, C and Olaniyan, J), Jan., 52

Embrittlement
Low-temperature aging kinetics in cast duplex stainless steels: experimental characterization (González, JJ, Gutiérrez-Solana, F, Sánchez, L, and Setién, J), March, 154

Endurance tests
Ultrasonic technique for monitoring automotive components (Lopes, R, Mazzeranghi, A, Ronchiato, G, and Vangi, D), Sept., 516

Environmentally improved fabrics
Effects of laundering and exposure to light on environmentally-improved fabrics (Leimer, S, Moore, MA, and Goldsmith, E), Sept., 497

Environmentally restricted materials
Expert infobase system for tracing hazardous materials in engineering documents and system requirements for materials information standardization (U, AS and Toomer, B), May, 341

Experiment design
Statistical design of experiments in metal cutting—Part One: Methodology (Astakhov, VP, Osman, MOM, and Al-Ata, M), May, 322
Statistical design of experiments in metal cutting—Part Two: Applications (Astakhov, VP, Osman, MOM, and Al-Ata, M), May, 328

F

Fabrics
Effects of surface geometry on fabric friction (Ajayi, JO and Elder, HM), March, 182

Falling head test
New apparatus for measuring the drainage properties of porous asphalt mixes (Ann, TS, Fang, FT, and Tiong, CC), July, 370

Fatigue
Analysis of fatigue data with runouts based on a model with nonconstant standard deviation and a fatigue limit parameter (Pascual, FG and Meeker, WQ), May, 292
Estimating creep rates during tensile cyclic loading (Arbel, A), May, 358
Fatigue testing of microspecimens from a weldment (Yuan, B and Sharpe, WN, Jr.), Sept., 485

Fatigue crack growth
Fatigue and creep crack growth in fine sand asphalt materials (Kleemans, CP, Zuidema, J, Krans, RL, Molenaar, JMM, and Tolman, F), July, 424

Fatigue curve models
Analysis of fatigue data with runouts based on a model with nonconstant standard deviation and a fatigue limit parameter (Pascual, FG and Meeker, WQ), May, 292

Fatigue data
Analysis of fatigue data with runouts based on a model with nonconstant standard deviation and a fatigue limit parameter (Pascual, FG and Meeker, WQ), May, 292

Fatigue life distribution
Analysis of fatigue data with runouts based on a model with nonconstant standard deviation and a fatigue limit parameter (Pascual, FG and Meeker, WQ), May, 292

Fatigue limit
Analysis of fatigue data with runouts based on a model with nonconstant standard deviation and a fatigue limit parameter (Pascual, FG and Meeker, WQ), May, 292

Fatigue tests
Ultrasonic technique for monitoring automotive components (Lopes, R, Mazzeranghi, A, Ronchiato, G, and Vangi, D), Sept., 516

Fiber-matrix interphase
Ultrasonic characterization of interphasial properties in sapphire/Haynes 214 com-
phosphates (Huang, W, Chu, YC, Rokhlin, SI, and Wright, PK), Jan., 1

Fiber pull-out
Mixed mode fiber pull-out equipment: applications and results (Leung, CKY and Geng, VP), May, 283

Fibrillation behavior
Evaluation of the fibrillation behavior of oriented polymer tapes using a tensile test method (Mahajan, SJ and Deopura, BL), May, 315

Field screening
Development and precision testing of a standard test method for screening fuels in soils (Sorini, SS and Schabron, JF), July, 400

Fine sand asphalt
Fatigue and creep crack growth in fine sand asphalt mixtures (Kleemans, CP, Zuiderma, J, Krans, RL, Molenaar, JMM, and Tolman, F), July, 424

Fire standards
Methodology for the fire resistance testing of structural components at reduced scale (O’Connor, DJ, Morris, B, and Silcock, GWH), May, 273

Fire tests
Methodology for the fire resistance testing of structural components at reduced scale (O’Connor, DJ, Morris, B, and Silcock, GWH), May, 273

Flaw characterization
PC-based near real-time ultrasonic imaging system for flaw characterization (Anand, RS and Kumar, V), Nov., 529

Flexural stiffness
Transverse vibration of a simply supported beam with symmetric overhang of arbitrary length (Murphy, JF), Sept., 522

Floor assemblies
Effect of construction adhesive and joist variability on the deflection behavior of light-frame wood floors (Pellicane, PJ and Robinson, G), March, 163

Footwear
Effect of footwear midsole hardness and thickness on proprioception and stability in older men (Waked, E, Robbins, S, and McClaran, J), Jan., 143

Force plate
Comparison of walkway safety tribometers: Part Two (Marpet, MI and Fleischer, DH), Jan., 115

Fracture
Effect of preloading on the strength of soda-lime glass (Chen, X and Matsumura, M), May, 354

Fracture energy
Measurement of the fracture energy of interfaces in composites through sandwich-type chevron-notched specimens (Shaw, LL), July, 391

Fracture mechanics
Determination of the G factor: influence of side grooving (Cassanelli, AN, de Vedia, LA, and Herrera, R), Nov., 543

Elastic compliance of the compact tension specimen comprising two linear-elastic materials bonded with a thin layer (McNeary, JM, Havens, R, and Ritchie, RO), Jan., 28

High resolution R-curve characterization of the fracture toughness of thin sheet aluminum alloys (Haynes, MJ and Gangloff, RP), Jan., 82

Measurement of the fracture energy of interfaces in composites through sandwich-type chevron-notched specimens (Shaw, LL), July, 391

Modified normalization method for developing J-R and CTOD-R curves with the LMN function (Fortes, CJFO and Bastian, FL), May, 302

Shear lap-joint testing with rubber substrate (Chang, DJ and Hanna, WD), July, 406

Fracture testing
Tapered double-cantilever-beam specimen designed for constant-K testing at elevated temperatures (Beres, W, Koul, AK, and Thamburaj, R), Nov., 536

Fracture toughness
High resolution R-curve characterization of the fracture toughness of thin sheet aluminum alloys (Haynes, MJ and Gangloff, RP), Jan., 82

Modified normalization method for developing J-R and CTOD-R curves with the LMN function (Fortes, CJFO and Bastian, FL), May, 302

Tapered double-cantilever-beam specimen designed for constant-K testing at elevated temperatures (Beres, W, Koul, AK, and Thamburaj, R), Nov., 536

Free vibration

Friction
Effects of surface geometry on fabric friction (Ajayi, JO and Elder, HM), March, 182

Fuels
Development and precision testing of a standard test method for screening fuels in soils (Sorini, SS and Schabron, JF), July, 400

Fully testable D-latch (FTD)
Testing and design of CMOS D-latches (Aissi, C and Olaniran, J), Jan., 52

Gait
Kinematic methods for quantifying loss of balance while negotiating a curved path on a slippery surface (Wang, B, Bhattacharya, A, Bagchee, A, Wang, W, and Succop, PA), Jan., 135

Geogrid
Local versus global strain measurement of a polymeric geogrid (Perkins, SW, Schulz, JL, and Lapreye, JA), Nov., 576

Geometric surface area
Comparison of calculated geometric surface area and measured BET surface area for a metal powder (Schröder-Pedersen, A, Kjellmer, J, and Larsen, B), July, 365

Geosynthetics
Local versus global strain measurement of a polymeric geogrid (Perkins, SW, Schulz, JL, and Lapreye, JA), Nov., 576

Glass
Effect of preloading on the strength of soda-lime glass (Chen, X and Matsumura, M), May, 354

Hazardous waste
Expert infobase system for tracing hazardous materials in engineering documents and system requirements for materials information standardization (U, AS and Toomer, B), May, 341

Highway traffic materials
Characterization of styrene-butadiene-styrene polymer modified bitumen—comparison of conventional methods and dynamic mechanical analyses (Lu, X and Isacsson, U), July, 383

Hip simulator testing
Significance of nonlinear motion in the wear screening of orthopaedic implant materials (Wang, A, Polineni, VK, Essner, A, Sokol, M, Sun, DC, Stark, C, and Dumbleton, JH), March, 239

Homogeneous units
Development of a road roughness profile delineation procedure (Divinsky, M, Nesiichi, S, and Livnev, M), July, 445

Hone dynamics
Study on the prediction of roundness variance by hone dynamics in honing (Kim, JD and Choi, M-S), Nov., 556

Hot strength
Hot plane strain compression testing of aluminum alloys (Shi, H, McLaren, AJ, Sel-
Hydration
Low-cost, computer-controlled adiabatic calorimeter for determining the heat of hydration of concrete (Gibson, GJ, Ballim, Y, and Grieve, GRH), March, 261

J-integral
Nonvibrating Kelvin probe and its application to the LMN function (Fortes, A, Bagchee, A, Wang, W, and Succop, PA), Sept., 465

Instrumented shear bolts
Measurement of load distribution in multiple-bolted wood connections (Stelmokas, JW, Zink, AG, Loferski, JL, and Dolan, JD), Sept., 510

Interferometry
Fatigue testing of microspecimens from a weldment (Yuan, B and Sharpe, WN, Jr.), Sept., 485

Interlaboratory studies
Repeatability and reproducibility for pass/fail data (Mandel, J), March, 151

Iosipescue composite specimens
Experimental assessment of four composite material shear test methods (Adams, DF and Lewis, EQ), March, 174

J-K
Modified normalization method for developing J-R and CTOD-R curves with the LMN function (Fortes, CJFO and Bastian, FL), May, 322

Joint
Effect of construction adhesive and joist variability on the deflection behavior of light-frame wood floors (Pellicane, PJ and Robinson, G), March, 163

Kelvin probe
Nonvibrating Kelvin probe and its application for monitoring surface wear (Zanoria, ES, Hamall, K, Danyluk, S, and Zharin, AL), March, 233

Kinematics
Kinematic methods for quantifying loss of balance while negotiating a curved path on a slippery surface (Wang, B, Bhattacharya, A, Bagchee, A, Wang, W, and Succop, PA), Jan., 135

Lap joint
Shear lap-joint testing with rubber substrate (Chang, DJ and Hanna, WD), July, 406

Laser speckles
Residual stresses in plastic pipes by laser speckle technique (Seif, MA, Kishawy, HA, and Hassan, MA), Sept., 465

Light alloys

Light frame
Effect of construction adhesive and joist variability on the deflection behavior of light-frame wood floors (Pellicane, PJ and Robinson, G), March, 163

Liquid porosimetry
Relationship between porosity and air permeability of woven textile fabrics (Epps, HH and Leonas, KK), Jan., 108

Load distribution
Measurement of load distribution in multiple-bolted wood connections (Stelmokas, JW, Zink, AG, Loferski, JL, and Dolan, JD), Sept., 510

Loading rates
Determination of tensile properties at increased strain rates and various temperatures (Schindler, HJ and Veidt, M), Nov., 571

Long-life fatigue behavior
Effect of specimen thickness on the long-life fatigue performance of a long-rod oriented continuous-strand glass-mat-reinforced polypropylene composite (Little, RE), Sept., 491

Manufacture
Residual stresses in plastic pipes by laser speckle technique (Seif, MA, Kishawy, HA, and Hassan, MA), Sept., 465

Marshall stability
Relating triaxial test properties of asphalt mixtures to mix parameters determined by Marshall stability test (Fwa, TF, Tan, SA, and Low, BH), Sept., 471

Mass transfer
Test method to determine the relative humidity dependence of the air permeability of woven textile fabrics (Gibson, PW, Elsaid, AE, Kendrick, CE, Rivin, D, and Charmeii, M), July, 416

Materials information standardization
Expert infobase system for tracing hazardous materials in engineering documents and system requirements for materials information standardization (U, AS and Toomer, B), May, 341

Materials specifications
Material specifications of advanced ceramics and other issues in the use of property databases with corrosion analysis models (Munro, RG), May, 349

Mathematical model
Statistical design of experiments in metal cutting—Part Two: Applications (Astakhov, VP, Osman, MOM, and Al-Ata, M), May, 328

Mean strain
Strain-controlled cumulative fatigue with mean strains and high-cycle and low-cycle interaction (Gong, Y and Norton, MP), July, 429

Mean stress
Strain-controlled cumulative fatigue with mean strains and high-cycle and low-cycle interaction (Gong, Y and Norton, MP), July, 429

Mechanical properties
Determination of tensile properties at increased strain rates and various temperatures (Schindler, HJ and Veidt, M), Nov., 571

Mechanical testing
Consensus values and reference values illustrated by the Charpy machine certification program (Wang, JC-M and Splett, JD), May, 308

Metal cutting
Statistical design of experiments in metal cutting—Part One: Methodology (Astakhov, VP, Osman, MOM, and Al-Ata, M), May, 322

Metal powders
Comparison of calculated geometric surface area and measured BET surface area for a metal powder (Schröder-Pedersen, A, Kjøller, J, and Larsen, B), July, 365

Metals
Statistical design of experiments in metal cutting—Part Two: Applications (Astakhov, VP, Osman, MOM, and Al-Ata, M), May, 322

Statistical design of experiments in metal cutting—Part Two: Applications (Astakhov, VP, Osman, MOM, and Al-Ata, M), May, 322
Microhardness
Low-temperature aging kinetics in cast duplex stainless steels: experimental characterization (González, JJ, Gutiérrez-Solana, F, Sánchez, L, and Sietén, J), March, 154

Microindentation
Needs and challenges in precision wear measurement (Blau, PF), March, 216

Micromechanical models
Mixed mode fiber pull-out equipment: applications and results (Leung, CKY and Geng, YP), May, 283
Ultrasonic characterization of interphasesal properties in sapphire/Haynes 214 composites (Huang, W, Chu, YC, Rokhlin, SI, and Wright, PK), Jan., 1

Microspecimens
Fatigue testing of microspecimens from a weldment (Yuan, B and Sharpe, WN, Jr.), Sept., 485

Mixed mode
Mixed mode fiber pull-out equipment: applications and results (Leung, CKY and Geng, YP), May, 283

Models
Methodology for the fire resistance testing of structural components at reduced scale (O’Connor, DJ, Morris, B, and Silcock, GWH), May, 273

Molecular orientation
Evaluation of the fibrillation behavior of oriented polymer tapes using a tensile test method (Mahajan, SJ and Deopura, BL), May, 315

Monitoring
Introduction to symposium on needs and applications in precision measurement and monitoring of wear (Blau, PF), March, 215

Multiple-bolted wood connections
Measurement of load distribution in multiple-bolted wood connections (Stelmokas, JW, Zink, AG, Loferski, JL, and Dolan, JD), Sept., 510

Multivariate regression
Regression analysis as an aid in making oboe reeds (Ceasar-Spall, K and Spall, JC), July, 439

Musical instrument
Regression analysis as an aid in making oboe reeds (Ceasar-Spall, K and Spall, JC), July, 439

Nanoindentation
Needs and challenges in precision wear measurement (Blau, PF), March, 216

Neural network
Neural network approach for prediction of wrinkling limit in square metal sheet under diagonal tension (Di, S and Thomson, PF), Jan., 74

Nondestructive testing
First continuous remote bridge monitoring system ensures safe operation of 65-year-old rolling bascule bridge (Prine, D), March, 267
PC-based near real-time ultrasonic imaging system for flaw characterization (Anand, RS and Kumar, V), Nov., 529

ηp factor
Determination of ηp factor: influence of side grooving (Cassaneli, AN, de Vedia, LA, and Herrera, R), Nov., 543

O

Oboe reed quality
Regression analysis as an aid in making oboe reeds (Ceasar-Spall, K and Spall, JC), July, 439

Overhangs
Transverse vibration of a simply supported beam with symmetric overhang of arbitrary length (Murphy, JF), Sept., 522

P

Parameter of optimization
Statistical design of experiments in metal cutting—Part One: Methodology (Astakhov, VP, Osman, MOM, and Al-Aia, M), May, 322

Pass/fail data
Repeatability and reproducibility for pass/fail data (Mandel, J), March, 151

Pavement
Relationship between statistical distributions of traffic loads and pavement responses (Newcomb, DE, Chadbourn, BA, and Van Deusen, DA), March, 190

Pavement materials
Determination of thermal properties of pavement materials and unbonded aggregates by transient heat conduction (Tan, S-A, Fwa, T-F, Chuai, C-T, and Low, B-H), Jan., 15

Pavement surfaces
Development of a road roughness profile delineation procedure (Divinsky, M, Nesich, S, and Livneh, M), July, 445

Pendulum tester
Use of the Tortus and the Pendulum with the 4S rubber for the assessment of slip resistance in the laboratory and the field (Dravitzki, VK and Potter, SM), Jan., 127

Permeability apparatus
New apparatus for measuring the drainage properties of porous asphalt mixtures (Ann, TS, Fang, FT, and Tiong, CC), July, 370

Plane strain compression
Hot plane strain compression testing of aluminum alloys (Shi, H, McLaren, AJ, Sellars, CM, Shahani, R, and Bolingbrook, R), Jan., 61

Plastic pipes
Residual stresses in plastic pipes by laser speckle technique (Seif, MA, Kishawy, HA, and Hassan, MA), Sept., 465

Playing fields
Development and evaluation of a method to measure traction on turfgrass surfaces (McNitt, AS, Middour, RO, and Waddington, DV), Jan., 99

Plowling moment
Analysis of plowing and adhesive effects in the rolling ball tack method for pressure sensitive adhesives (Miyagi, Z, Yamada, N, Urahama, N, and Yamamoto, K), Jan., 23

Polishes
Comparison of walkway safety tribometers: Part Two (Marpet, MI and Fleischer, DH), Jan., 115
Effect of footwear midsole hardness and thickness on proprioception and stability in older men (Waked, E, Robbins, S, and McClaran, J), Jan., 143
Introduction to international symposium on slip resistance: the interface of man, footwear, and walking surfaces (Sacher, A and Ownes, JM), Jan., 114
Kinematic methods for quantifying loss of balance while negotiating a curved path on a slippery surface (Wang, B, Bhattacharya, A, Bagchee, A, Wang, W, and Succop, PA), Jan., 135
Use of the Tortus and the Pendulum with the 4S rubber for the assessment of slip resistance in the laboratory and the field (Dravitzki, VK and Potter, SM), Jan., 127

Polymer modified bitumens
Characterization of styrene-butadiene-styrene polymer modified bitumens—comparison of conventional methods and dynamic mechanical analyses (Lu, X and Isacsson, U), July, 383

Polymer tapes
Evaluation of the fibrillation behavior of oriented polymer tapes using a tensile test method (Mahajan, SJ and Deopura, BL), May, 315

Polymers
Local versus global strain measurement of a polymeric geogrid (Perkins, SW, Schulz, JL, and Lapeyre, JA), Nov., 576

Porosity
Relationship between porosity and air permeability of woven textile fabrics (Epps, HH and Leonas, KK), Jan., 108
Subject Index

**R**

**R-curves**

High resolution R-curve characterization of the fracture toughness of thin sheet aluminum alloys (Haynes, MJ and Gangloff, RP), Jan., 82

**Reciprocating wear testing**

Significance of nonlinear motion in the wear screening of orthopaedic implant materials (Wang, A, Polineni, VK, Essner, A, Sokol, M, Sun, DC, Stark, C, and Dumbleton, JH), March, 239

**Recovery experimental technique**

Constitutive model for metals at high strain rates accurately determined by the tensile impact recovery experimental technique (Wang, C, Zhou, Y, and Xia, Y), July, 378

**Reference value**

Consensus values and reference values illustrated by the Charpy machine certification program (Wang, JC-M and Splett, JD), May, 308

**Regression analysis**

Calibrating instrument readings using a bivariate confidence interval (McDonald, BJ and Trautner, JJ), Jan., 36

**Regression equation**

Statistical design of experiments in metal cutting—Part Two: Applications (Astakhov, VP, Osman, MOM, and Al-Ata, M), May, 328

**Reinforcement**

Local versus global strain measurement of a polymeric geogrid (Perkins, SW, Schulz, JL, and Lapeyre, JA), Nov., 576

**Remote monitoring**

First continuous remote bridge monitoring system ensures safe operation of 65-year-old rolling bascule bridge (Prine, D), March, 267

**Repeatability**

Repeatability and reproducibility for pass/fail data (Mandel, J), March, 151

**Reproducibility**

Repeatability and reproducibility for pass/fail data (Mandel, J), March, 151

**Residual stresses**

Residual stresses in plastic pipes by laser speckle technique (Seif, MA, Kishawy, HA, and Hassan, MA), Sept., 465

**Resistivity**

Eddy current decay resistivity measurements using a digital voltmeter (Hua, CY, McDonald, LC, and Hartwig, KT), Jan., 41

**Response variables**

Development of a road roughness profile delineation procedure (Divinsky, M, Nesichi, S, and Livneh, M), July, 445

**Road paving materials**

Characterization of styrene-butadiene-styrene polymer modified bitumens—comparison of conventional methods and dynamic mechanical analyses (Lu, X and Isacsson, U), July, 383

Development of a road roughness profile delineation procedure (Divinsky, M, Nesichi, S, and Livneh, M), July, 445

Fatigue and creep crack growth in fine sand asphalt materials (Kleemans, CP, Zuidema, J, Krans, RL, Molenaar, JMM, and Tolman, F), July, 424

New apparatus for measuring the drainage properties of porous asphalt mixes (Ann, TS, Fang, FT, and Tiong, CC), July, 370

Relating triaxial test properties of asphalt mixtures to mix parameters determined by Marshall stability test (Fwa, TF, Tan, SA, and Low, BH), Sept., 471

**Road roughness**

Development of a road roughness profile delineation procedure (Divinsky, M, Nesichi, S, and Livneh, M), July, 445

**Rolling ball tack**

Analysis of plowing and adhesive effects in the rolling ball tack method for pressure sensitive adhesives (Miyagi, Z, Yamada, N, Urahama, N, and Yamamoto, K), Jan., 23

**Roundness variation**

Study on the prediction of roundness variation by hone dynamics in honing (Kim, JD and Choi, M-S), Nov., 556

**Rubber substrate**

Shear lap-joint testing with rubber substrate (Chang, DJ and Hanna, WD), July, 406

**Sandwich specimens**

Elastic compliance of the compact tension specimen comprising two linear-elastic materials bonded with a thin layer (McNaughton, JM, Havens, R, and Ritchie, RO), Jan., 28

Measurement of the fracture energy of interfaces in composites through sandwich-type chevron-notched specimens (Shaw, LL), July, 391

**Security equipment**

Effective vulnerability assessment of tamper-indicating seals (Johnston, RG), July, 451

**Security seals**

Effective vulnerability assessment of tamper-indicating seals (Johnston, RG), July, 451

**Shear moduli**

Experimental assessment of four composite material shear test methods (Adams, DF and Lewis, EQ), March, 174

**Shear strength**

Experimental assessment of four composite material shear test methods (Adams, DF and Lewis, EQ), March, 174

Shear lap-joint testing with rubber substrate (Chang, DJ and Hanna, WD), July, 406

**Shear testing**

Experimental assessment of four composite material shear test methods (Adams, DF and Lewis, EQ), March, 174

**Sheet metal**

Neural network approach for prediction of wrinkling limit in square metal sheet under diagonal tension (Di, S and Thomson, PF), Jan., 74

**Side groove influence**

Determination of \( n_{\theta} \) factor: influence of side grooving (Cassanelli, AN, de Vedia, LA, and Herrera, R), Nov., 543

**Simulation**

Study on the prediction of roundness variation by hone dynamics in honing (Kim, JD and Choi, M-S), Nov., 556
**Slip resistance**
Comparison of walkway safety tribometers: Part Two (Marpet, Ml and Fleischer, DH), Jan., 115

Effect of footwear midsole hardness and thickness on proprioception and stability in older men (Waked, E, Robbins, S, and McClaran, J), Jan., 143

Introduction to international symposium on slip resistance: the interface of man, footwear, and walking surfaces (Sacher, A and Ownes, JM), Jan., 114

Kinematic methods for quantifying loss of balance while negotiating a curved path on a slippery surface (Wang, B, Bhattacharya, A, Bagchee, A, Wang, W, and Succop, PA), Jan., 135

Use of the Tortus and the Pendulum with the 4S rubber for the assessment of slip resistance in the laboratory and the field (Dravitzki, VK and Potter, SM), Jan., 127

**Soda-lime glass**
Effect of preloadig on the strength of soda-lime glass (Chen, X and Matsumura, M), May, 354

**Soils**
Development and precision testing of a standard test method for screening fuels in soils (Sorini, SS and Schabron, JF), July, 400

**Solution viscosity**
Hoechst Celanese improves consistency of cellulose acetate through automated viscosity measurement (Hawley, L), Sept., 525

**Spherical particles**
Comparison of calculated geometric surface area and measured BET surface area for a metal powder (Schroeder-Pedersen, A, Kjoller, J, and Larsen, B), July, 365

**Sports facilities**
Development and evaluation of a method to measure traction on turfgrass surfaces (McNitt, AS, Middour, RO, and Waddington, DV), Jan., 99

**Sports injuries**
Development and evaluation of a method to measure traction on turfgrass surfaces (McNitt, AS, Middour, RO, and Waddington, DV), Jan., 99

**Stability**
Effect of footwear midsole hardness and thickness on proprioception and stability in older men (Waked, E, Robbins, S, and McClaran, J), Jan., 143

**Stainless steels**
Low-temperature aging kinetics in cast duplex stainless steels: experimental characterization (González, JJ, Gutiérrez-Solana, F, Sánchez, L, and Setién, J), March, 154

**Stirring resistor**
Experiments increase understanding of chonic obstructive lung disease (Kayser, B), Nov., 584

**Statistical analysis of variance**
Effect of specimen thickness on the long-life fatigue performance of a randomly-oriented continuous-strand glass-mat-reinforced polypropylene composite (Little, RE), Sept., 491

**Statistics**
Calibrating instrument readings using a bivariate confidence interval (McDonald, BJ and Trautner, JJ), Jan., 36

Regression analysis as an aid in making oboe reeds (Ceasar-Spall, K and Spall, JG), July, 439

**Steels**
Experimental determination of the cooling curve for production of continuous-cast steel billets (Bailey, WH, Jr.), Jan., 49

Strain-controlled cumulative fatigue with mean strains and high-cycle and low-cycle interaction (Gong, Y and Norton, MP), July, 429

**Step loading**
Strain-controlled cumulative fatigue with mean strains and high-cycle and low-cycle interaction (Gong, Y and Norton, MP), July, 429

**Strain rates**
Determination of tensile properties at increased strain rates and various temperatures (Schindler, HJ and Veidt, M), Nov., 571

**Stress corrosion cracking**
Application of analysis of variance (ANOVA) statistical methods to breaking load corrosion test (Golinkin, IA, Ruff, DD, Kvam, EP, McCabe, GP, and Grandt, AF, Jr.), Nov., 565

**Stress measurement**
Ultrasonic stress evaluation in a compressor rotor (Bray, DE, Tang, W, and Grewal, DS), Sept., 503

**Structural tests**
Methodology for the fire resistance testing of structural components at reduced scale (O'Connor, DJ, Morris, B, and Silcock, GWH), May, 273

**Surface engineering**
Theory and application of a micro-scale abrasive wear test (Rutherford, KL and Hutchings, IM), March, 250

**Surface roughness**
Precision profilometry of wear scars on curved surfaces (Yust, CS and Blau, PJ), March, 246

**Surface wear**
Nonvibrating Kelvin probe and its application for monitoring surface wear (Zanoria, ES, Hamall, K, Danyuk, S, and Zarhin, AL), March, 233

**Tamper-evident devices**
Effective vulnerability assessment of tamper-indicating seals (Johnston, RG), July, 451

**Tamper-indicating seals**
Effective vulnerability assessment of tamper-indicating seals (Johnston, RG), July, 451

**Temperature**
Determination of tensile properties at increased strain rates and various temperatures (Schindler, HJ and Veidt, M), Nov., 571

**Textiles**
Effects of laundering and exposure to light on environmentally-improved fabrics (Leimer, S, Moore, MA, and Goldsmith, E), Sept., 497

Effects of surface geometry on fabric friction (Ajayi, JO and Elder, HM), March, 182

Evaluation of the fibrillation behavior of oriented polymer tapes using a tensile test method (Mahajan, SJ and Deopura, BL), May, 315

Relationship between porosity and air permeability of woven textile fabrics (Epps, HH and Leonas, KK), Jan., 108

Test method to determine the relative humidity dependence of the air permeability of woven textile fabrics (Gibson, PW, Elsaidii, AE, Kendrick, CE, Rivin, D, and Charmchi, M), July, 416

**Thermal behavior**
Low-cost, computer-controlled adiabatic calorimeter for determining the heat of hydration of concrete (Gibson, JG, Ballim, Y, and Grieve, GRH), March, 261

**Thermal conductivity**
Determination of thermal properties of pavement materials and unbound aggregates by transient heat conduction (Tan, S-A, Fwa, T-F, Chuai, C-T, and Low, B-H), Jan., 15
Thermal diffusivity
Determination of thermal properties of pavement materials and unbound aggregates by transient heat conduction (Tan, S-A, Fwa, T-F, Chua, C-T, and Low, B-H), Jan., 15

Thermal expansion
Instantaneous coefficient of linear thermal expansion—a new definition (Bhattachar, VS), Sept., 479

Thermal insulation
Determination of thermal properties of pavement materials and unbound aggregates by transient heat conduction (Tan, S-A, Fwa, T-F, Chua, C-T, and Low, B-H), Jan., 15

Thermal measurements
Instantaneous coefficient of linear thermal expansion—a new definition (Bhattachar, VS), Sept., 479

Thermal strain
Instantaneous coefficient of linear thermal expansion—a new definition (Bhattachar, VS), Sept., 479

Thermocouples
Experimental determination of the cooling curve for production of continuous-cast steel billets (Bailey, WH, Jr.), Jan., 49

Thermodynamic coupling
Constitutive model for metals at high strain rates accurately determined by the tensile impact recovery experimental technique (Wang, C, Zhou, Y, and Xia, Y), July, 378

Thickness effects
Effect of specimen thickness on the long-life fatigue performance of a randomly-oriented continuous-strand glass-mat-reinforced polyethylene composite (Little, RE), Sept., 491

High resolution R-curve characterization of the fracture toughness of thin sheet aluminum alloys (Haynes, MJ and Gangloff, RP), Jan., 82

Tool materials
Needs and applications in precision measurement and monitoring of wear (Budinski, KG), March, 226

Tortus instrument
Use of the Tortus and the Pendulum with the 4S rubber for the assessment of slip resistance in the laboratory and the field (Dravitzki, VK and Potter, SM), Jan., 127

Traction
Development and evaluation of a method to measure traction on turfgrass surfaces (McNitt, AS, Middour, RO, and Waddington, DV), Jan., 99

Traffic data
Relationship between statistical distributions of traffic loads and pavement responses (Newcomb, DE, Chadbourn, BA, and Van Deusen, DA), March, 190

Traffic detectors
Evaluation of overhead and in-ground vehicle detector technologies for traffic flow measurement (Klein, LA, Kelley, MR, and Mills, MK), March, 205

Traffic flow measurement
Evaluation of overhead and in-ground vehicle detector technologies for traffic flow measurement (Klein, LA, Kelley, MR, and Mills, MK), March, 205

Transient heat conduction
Determination of thermal properties of pavement materials and unbound aggregates by transient heat conduction (Tan, S-A, Fwa, T-F, Chua, C-T, and Low, B-H), Jan., 15

Transistors
Testing and design of CMOS D-latches (Aissi, C and Olaniany, J), Jan., 52

Transverse vibration
Transverse vibration of a simply supported beam with symmetric overhang of arbitrary length (Murphy, JF), Sept., 522

Triaxial test
Relating triaxial test properties of asphalt mixtures to mix parameters determined by Marshall stability test (Fwa, TF, Tan, SA, and Low, BH), Sept., 471

Tribometers
Comparison of walkway safety tribometers: Part Two (Marpet, MI and Fleischer, DH), Jan., 115

Turbine components
Ultrasonic stress evaluation in a compressor rotor (Bray, DE, Tang, W, and Grewal, DS), Sept., 503

Turfgrass
Development and evaluation of a method to measure traction on turfgrass surfaces (McNitt, AS, Middour, RO, and Waddington, DV), Jan., 99

Ultra-high molecular weight polyethylene
Significance of nonlinear motion in the wear screening of orthopaedic implant materials (Wang, A, Polimeni, VK, Essner, A, Sokol, M, Sun, DC, Stark, C, and Dumbleton, JH), March, 239

Ultrasonic examinations
PC-based near real-time ultrasonic imaging system for flaw characterization (Anand, RS and Kumar, V), Nov., 529

Ultrasonic velocity method
Ultrasonic characterization of interphasial properties in sapphire/Haynes 214 composites (Huang, W, Chu, YC, Rokhlin, SI, and Wright, PK), Jan., 1

Ultrasonics
Ultrasonic stress evaluation in a compressor rotor (Bray, DE, Tang, W, and Grewal, DS), Sept., 503

Vehicle-pavement systems
Calibration of weigh-in-motion systems through dynamic vehicle simulation (Papagiannakis, AT), March, 197

Evaluation of overhead and in-ground vehicle detector technologies for traffic flow measurement (Klein, LA, Kelley, MR, and Mills, MK), March, 205

Introduction to symposium on international advanced vehicle/transportation infrastructure technology (Foderberg, DC), March, 189

Relationship between statistical distributions of traffic loads and pavement responses (Newcomb, DE, Chadbourn, BA, and Van Deusen, DA), March, 190

Ultrasonic technique for monitoring automotive components (Lopes, R, Mazzerangi, A, Ronchiato, G, and Vangi, D), Sept., 516

Vehicle simulations
Calibration of weigh-in-motion systems through dynamic vehicle simulation (Papagiannakis, AT), March, 197

Vehicle/transportation infrastructure
Introduction to symposium on international advanced vehicle/transportation infrastructure technology (Foderberg, DC), March, 189

Viscoelastic materials

Viscosity measurement
Hoechst Celanese improves consistency of cellulose acetate through automated viscosity measurement (Hawley, L), Sept., 525

Voltmeters
Eddy current decay resistivity measurements using a digital voltmeter (Hua, CY, McDonald, LC, and Hartwig, KT), Jan., 41

W-Y

Waste management
Development and precision testing of a standard test method for screening fuels in soils (Sorini, SS and Schabron, JF), July, 400
Wear
Introduction to symposium on needs and applications in precision measurement and monitoring of wear (Blau, PF), March, 215
Needs and applications in precision measurement and monitoring of wear (Budinski, KG), March, 226
Needs and challenges in precision wear measurement (Blau, PJ), March, 216
Nonvibrating Kelvin probe and its application for monitoring surface wear (Zanoria, ES, Hamall, K, Danyluk, S, and Zharin, AL), March, 233
Precision profilometry of wear scars on curved surfaces (Yust, CS and Blau, PJ), March, 246
Significance of nonlinear motion in the wear screening of orthopaedic implant materials (Wang, A, Polineni, VK, Essner, A, Sokol, M, Sun, DC, Stark, C, and Dumbleton, JH), March, 239
Theory and application of a micro-scale abrasive wear test (Rutherford, KL and Hutchings, IM), March, 250

Wear testing
Needs and challenges in precision wear measurement (Blau, PJ), March, 216
Theory and application of a micro-scale abrasive wear test (Rutherford, KL and Hutchings, IM), March, 250

Weigh-in-motion data
Calibration of weigh-in-motion systems through dynamic vehicle simulation (Papagiannakis, AT), March, 197
Relationship between statistical distributions of traffic loads and pavement responses (Newcomb, DE, Chadbourm, BA, and Van Deusen, DA), March, 190

Weighted averages
Consensus values and reference values illustrated by the Charpy machine certification program (Wang, JC-M and Splett, JD), May, 308

Weldments
Fatigue testing of microspecimens from a weldment (Yuan, B and Sharpe, WN, Jr.), Sept., 485

Wood
Effect of construction adhesive and joist variability on the deflection behavior of light-frame wood floors (Pellicane, PJ and Robinson, G), March, 163
Measurement of load distribution in multiple-bolted wood connections (Stelmokas, JW, Zink, AG, Loferski, JL, and Dolan, JD), Sept., 510
Transverse vibration of a simply supported beam with symmetric overhang of arbitrary length (Murphy, JF), Sept., 522

Work function
Nonvibrating Kelvin probe and its application for monitoring surface wear (Zanoria, ES, Hamall, K, Danyluk, S, and Zharin, AL), March, 233

Wrinkling
Neural network approach for prediction of wrinkling limit in square metal sheet under diagonal tension (Di, S and Thomson, PF), Jan., 74

Yarn crown
Effects of surface geometry on fabric friction (Ajayi, JO and Elder, HM), March, 182
