Journal of Testing and Evaluation (ISSN 0190-0518) is published in six issues per year by ASTM International. Some issues, in whole or in part, may be Special Issues focused on a specific client or area of interest.

The subject matter must not be of a speculative nature and the contents must not include materials of an advertising nature. The paper must not be seriously defective as to literary form and structure, continuity of thought, and clarity of expression. The substance of the paper should not have been published previously in the same literature.

For details regarding paper submission go to http://ms4.mannuscriptcentral.com/jote. The authors must state in parentheses after the SI units.

PURPOSE AND SCOPE
The editorial objectives of the Journal of Testing and Evaluation is to:

- Publishing new technical information derived from the field of laboratory testing, performance, quantitative characterization, and evaluation of those materials, products, systems, and services.
- Presenting new methods and data and critical evaluations of these methods and data.
- Reporting the author's experience with test methods and the results of interlaboratory testing and analysis.
- Providing the scientific basis for both new and improved ASTM International standards.
- Stimulating new ideas in the fields of testing and evaluation.
- Including papers, technical notes, letters to the editor, discussions of previously published papers, and book reviews as contributions.

INFORMATION FOR AUTHORS
For details regarding paper submission go to http://m4.manuscriptcentral.com/jte
The subject matter must not be of a speculative nature and the contents must not include materials of an advertising nature. The paper must not be seriously defective in its literary form and structure, continuity of thought, and clarity of expression. The substance of the paper should not have been published previously in the open literature. Authors preparing papers for submission should observe the conventions of style explained in the ASTM Style Manual. Since the journal does not request page charges, the author is expected to conform to these standards of conventions for style and the inclusion of complete references and high-quality figures. Sl. units are used throughout; if data were not measured in Sl. units, a note should appear to that effect and the original units should be included in parentheses after the SI units.

IN APPRECIATION OF THE REVIEWERS
The high-quality of the papers that appear in this publication is a tribute not only to the obvious efforts of the authors represented but to the unheralded, though essential, efforts of their reviewers. It is to the reviewers dedication to upholding the high standards of their profession that this note pays tribute. On behalf of ASTM International and the authors as well, we acknowledge with appreciation their important contribution to the success of this journal.
