EDITORIAL OBJECTIVES
The Journal of Testing and Evaluation is published in six issues per year by ASTM International, a nonprofit technical organization that develops and publishes voluntary consensus standards and related information for materials, products, systems, and services.

Some issues, in whole or in part, may be Special issues focused on a topic of interest to our readers.

Contributions are peer reviewed prior to publication.

PURPOSE AND SCOPE
The editorial objectives of the Journal of Testing and Evaluation is to serve a broad-based audience by:

• Publishing new technical information derived from the field of laboratory testing, performance, quantitative characterization, and evaluation of these materials, products, systems, and services.

• Presenting new methods and data and critical evaluations of these methods and data.

• Reporting the users’ experience with test methods and the results of interlaboratory testing and analysis.

• Providing the scientific basis for both new and improved ASTM International standards.

• Stimulating new ideas in the fields of testing and evaluation.

• Including papers, technical notes, letters to the editor, discussions of previously published papers, and book reviews as contributions.

INFORMATION FOR AUTHORS
For details regarding paper submission go to http://mc04.manuscriptcentral.com/astm.

The subject matter must not be of a speculative nature and the contents must not include materials of an advertising nature. The paper must not be seriously defective as to literary form and structure, continuity of thought, and clarity of expression. The substance of the paper should not have been published previously in the literature.

Authors preparing papers for submission should observe the conventions of style explained in the ASTM Style Manual. Since the journal does not request page charges, the author is expected to conform to these standard conventions for style and the inclusion of complete references and high-quality figures. SI units are to be used throughout, if data were not measured in SI units, a note should appear to that effect and the original units should be included in parentheses after the SI units.

In Appreciation of the reviewers
The high quality of the papers that appear in this publication is a tribute not only to the obvious efforts of the authors represented but also to the unheralded, though essential, efforts of their reviewers. It is to the reviewers dedication to upholding the high standards of their profession that this note pays tribute. On behalf of ASTM International and the authors as well, we acknowledge with appreciation their important contribution to the success of this journal.
