Contents:

681 A Comprehensive Study and Optimization of Magnetic Nanoparticle Drug Delivery to Cancerous Tissues via External Magnetic Field—Huizhong Zheng, Hanyu Yao, Miao Cui, Xuancheng Ren, Yushan Wei, and Qingyun Hu

704 A New Method for Direct Tensile Testing of Concrete—F. X. Auerswald, S. W. S. Lui, and A. V. Vinod

718 An Extended EDM Method for Localized Faults Detection of a Planetary Gearbox—Jing Liu, Liefeng Wang, Hanfeng Pan, Zhaocun Wang, and Zhanhu He

721 ANN Modeling of the Viscosity and Effective Thermal Conductivity of Non-Newtonian Nanofluids—A. Kumar, Pradeep Kumar and A. Venu Vasishth

809 Centrifuge Modeling of Stress and Pore Pressure Responses Due to Closed-Ended Pile Jacking in Silty Clay—N. Zhang, Fayou Ni, Jian-Kang Chen, and Yong-Ping Li

812 Characterization of Vegetable Oil-Based Nanocutting Fluids—V. Krishna Pasam, P. Ramamurthy, and Radhika Pratap

831 Crack Behavior of Rock-Like Specimens Containing Two Sets of Microcracks—H. M. A. Almutairi, N. A. Alhussain, and F. Alhussainy

837 An Analytical Model and Testing Method for Equivalent Stress-Strain Relation of Acrichite, Thin-Walled Steel Tube—Shijian Yuan, Wencai Xie, Yanli Lin, and Zhihong Li

847 Experimental Study on the Fracture Performance of Soil Samples Using Improved Wedge Splitting Test—Shijie Wang, Hanfeng Pan, and Shengxi Xiong

856 Experimental Study on the Strain Recovery of Concrete after Creep—J. Z. Zhang, X. P. Zhou, Y. Niu, and Q. H. Qian

864 Experimental Studies on the Influences of Chemical Corrosion on the Mode I Fracture Toughness of Sandstone—R. A. Khennani, A. A. ElSayed, and A. A. Alashty

883 Experimental Studies on the Fracture Performance of Group (a) Mixed Concrete—J. Z. Zhang, Y. Niu, and F. H. Zeng

885 Estimating the Parameters of Kumaraswamy Distribution Using Progressive Censored Data—Rashed M. M. Al-Sayyed

889 Critical Assessment of Infiltration Measurements for Soils with Varying Water Contents Using a Mini Disk Infiltrometer—Sanja K, M. Budak, and Z. I. Sezic

904 Centrifuge Modeling of Stress and Pore Pressure Responses Due to Closed-Ended Pile Jacking in Silty Clay—N. Zhang, Fayou Ni, Jian-Kang Chen, Yong-Ping Li, and Zhihong Li

909 Estimating the Parameters of Kumaraswamy Distribution Using Progressive Censored Data—Rashed M. M. Al-Sayyed

921 Evaluation of Cutting Tool Wear of Earth Pressure Balance Shield in Granular Soil Based on Laboratory Test—Fuying Wei, Xiaofei Zhao, Pei Su, Ming-ming Li, Fan Liu, and Yue You

932 Estimation of Thermal Conductivity Coefficients Using Artificial Neural Network—Mohammad Ali Sahraei and Elnaz Akbari

937 Estimation of Thermal Conductivity Coefficients Using Artificial Neural Network—Mohammad Ali Sahraei and Elnaz Akbari

942 Experimental Studies on the Influences of Chemical Corrosion on the Mode I Fracture Toughness of Sandstone—S. L. Peng, J. Z. Zhang, X. P. Zhou, Y. Niu, and G. H. Qian

959 Experimental Study on the Effects of Nanofillers Addition on Mechanical Properties of Concrete—Wen Zhang, Cai Dong, and Ying Wang

973 Experimental Testing and Evaluation of Newt BioSed and Heptano1 Blends in Diesel Engine—Yvanpran Devjaprom, Dinh Phu Buoi Munusamy, Sophon Nuvongphasat, and Boonpushpak Thodikumar

998 Foam Injection Molding of Polypropylene/Zinc Oxide Nanocomposite with Chemical Foaming Agent: Mechanical Properties and Morphology—Mingqian Allen and Tim Osswald

EDITORIAL OBJECTIVES
The Journal of Testing and Evaluation is published in six issues per year by ASTM International, a nonprofit technical organization that develops and publishes voluntary consensus standards and related information for materials, products, systems, and services. Some issues, in whole or in part, may be Special Issues focused on a topic of interest to our readers. Contributions are peer reviewed prior to publication.

PURPOSE AND SCOPE
The editorial objectives of the Journal of Testing and Evaluation is to serve a broad-based audience by:
- Publishing new technical information derived from the field and laboratory testing, performance, quantitative characterization, and evaluation of these materials, products, systems, and services.
- Presenting new methods and data and critical evaluations of these methods and data.
- Reporting the users’ experience with test methods and the results of interlaboratory testing and analysis.
- Providing the scientific basis for both new and improved ASTM International standards.
- Stimulating new ideas in the fields of testing and evaluation.
- Including papers, technical notes, letters to the editor, discussions of previously published papers, and book reviews as contributions.
