224 Development of Silicon Carbide Interlayers for Plasma Spray Yttria Topcoat on Graphite for High-Temperature Applications—E. Vetrivendan, B. Mohana, Ch. Jagadeeswara Rao, S. Prathakasan, and U. Kamachi Mudali

239 Preparation of Titanium-Aluminum-Carbon MAX Phase via a Simple Precursor Route for High-Temperature Coating Applications—K. Sreejith, Vipin Vijay, and T. Joyalatha

253 Development of C/SiC Fasteners for High-Temperature Applications—Shobhit Kumar, Anil Poinudy, Anurag Karmal, Saijayan Kuttipan, Ravi Ranjan Kumar, Shyin Palani Prabhakaran, and Nivasgh Devasin

268 Effect of Axial Load-Dependent Deformation Rate on the Grain Size Distribution and Mechanical Properties of Friction Stir Processed Copper—Antukkara Rajendran, Naresh Nadhammal, Kudheep Singh, and Satish V. Kosas

279 Evaluation of Fire Resistance for a Recycled 0.15 mass% Carbon Steel—Kotobu Nagai and Satoru Terayama

291 Influence of InterPulsed TIG Welding Parameters on the Evolution of Microstructure and Tensile Properties of Su-718 Alloy Sheets—Tushar Sonar, VisvaKumar Gupthaman, Sudebanan Malumdar, Thiruvenkatam Venkateswaran, and DineshKumar Sivakumar

322 Enhancing Tribological Properties of Inconel X-750 Superalloy through Surface Topography Modification by Shot Blasting—Vimal Edachery, Aashish John, Antukkara Rajendran, Vivek Srinivasappa, Sribalaji Mathiyalagan, Santosh Kumar, and Satish Vasu Kolas

Contents:

Special Issue on Materials for Extreme Environments, Part 1

Guest Editors: S. V. S. Narayana Murty and Richard W. Neu

1 Editorial: Special Issue on Materials for Extreme Environments, Part 1—S. V. S. Narayana Murty and Richard W. Neu

REVIEW PAPERS

3 Review of the Mechanical Properties of High-Strength Alloys at Cryogenic Temperatures—Osamu Umezawa

122 Mo-Silicide Alloys for High-Temperature Structural Applications—J. H. Perepezko, M. Krüger, and M. Heilmann

146 Advanced Materials and Manufacturing Technology Developments for Extreme Environment Gas Turbine Applications—Anand Kulkarni, Alister James, and Ahmed Kamil

161 Creep-Fatigue Behavior of a Newly Developed Ultra-Supercritical Steam Turbine Grade Nickel-Based Superalloy, HAYNES 282—Shreya Mukherjee, Kaustubh Banerjee, Soumitra Tarafder, S. Sivaprasad, and Sujoy Kumar Kar

177 Prediction of Long-Term Creep Properties of Zirconium-2.5 % Niobium Alloy Using Wilshire Method—Vivek Patel, R. N. Singh, and Madangopal Krishnan

207 High-Temperature Performance of Next-Generation Silicon Carbide Fibers for CMCs—Shay Harrison, John Schneider, Joseph Pegna, Erik Vaelter, Romvik Guguchinta, and Kirk Williams

Purpose and Scope

The journal publishes high-quality, original articles, including full papers, review papers, and technical notes, on both theoretical and practical aspects of the processing, structure, properties, and performance of materials used in mechanical, transportation, aerospace, energy systems, and medical devices. These materials include metals and alloys, glass and ceramics, polymers, composite materials, textiles, and nanomaterials. The journal covers topics related to the integrity of materials which encompasses mechanical testing, fatigue and fracture, corrosion, wear, and erosion, as well as the integrity of components and systems such as rolling element bearings, piping and pressure vessels, fasteners, space technology, and nanotechnology. The journal publishes articles on both qualitative and quantitative methods used to characterize materials including all forms of microscopy, chemical analysis, and nondestructive evaluation.
INFORMATION FOR AUTHORS
For details regarding paper submission go to http://mc04.manuscriptcentral.com.

The subject matter must not be of a speculative nature and the contents must not include materials of an advertising nature. The paper must not be seriously defective as to literary form and structure, continuity of thought, and clarity of expression. The substance of the paper should not have been published previously in the open literature.

Authors preparing papers for submittal should observe the conventions of style explained in the ASTM Style Manual. Since the journal does not request page charges, the author is expected to conform to these standard conventions for style.

SI units are to be used throughout; if data were not measured in SI units, a note should appear to that effect and the original units should be included in parentheses after the SI units.

IN APPRECIATION OF THE REVIEWERS
The high quality of the papers that appear in this publication is a tribute not only to the obvious efforts of the authors represented but to the unheralded, though essential, efforts of their reviewers. It is to the reviewers’ dedication to upholding the high standards of their profession that this note pays tribute. On behalf of ASTM International and the authors as well, we acknowledge with appreciation their important contribution to the success of this journal.
